To Promote the Progress of Science and Useful Arts

The Director

of the United States Patent and Trademark Office has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.

Therefore, this United States

Patent

grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America, and if the invention is a process, of the right to exclude others from using, offering for sale or selling throughout the United States of America, products made by that process, for the term set forth in 35 U.S.C. 154(a)(2) or (c)(1), subject to the payment of maintenance fees as provided by 35 U.S.C. 41(b). See the Maintenance Fee Notice on the inside of the cover.

Press Release: PATENT ANNOUNCEMENT

Good Morning / Afternoon / Evening

B2B Industrial, Inc. is excited to announce the public release of our third approved patent, and second in the United States for our composite blasting mats.

The Introduction of this mat design aims to revolutionize the industry with a variable composite mat design, capable of the same coverage and durability as our current offerings at approximately 6% of the weight by square footage. This reduced weight and pliability, offers many advantages to our clients in commissioning and deployment in various areas, shipping, use cases, and innovative integrated data tools.

Our current product lineup of "patented" mats are applicable in a wide variety of applications as well. Our new patented composite mats have the ability to be transported in a tube, in a ½ ton, ¾ ton truck or trailer and in light weight shipping applications, for immediate delivery all over the world, by plane. They are capable of handling a wide variety of explosives due to the ability to truly customize a clients product design with control over the makeup of their end product.

B2B Industrial, Inc. is currently looking for current and future clients to participate in championing the product during its initial roll-out to clients over the next few years.

Sincerely,

Kevin Fitzgerald
Vice President, Global Sales
