

Cert.

Hospital grade hygiene

A POWERFUL DETERGENT AND DISINFECTANT IN ONE APPLICATION

**DESTROYS THE *SARS-COV-2
VIRUS, WHICH CAUSES COVID-19,
IN JUST 60 SECONDS!**

**KILLS 99.99% OF MICROORGANISMS
AND HOUSEHOLD GERMS**

Cert. is like nothing you might have seen before for your home cleaning and hygiene. Scientifically proven to kill 99.99% of microorganisms and household germs – and destroy the *SARS-CoV-2 virus, which causes COVID-19, it brings into your home a hospital standard of cleanliness.

We manufacture disinfection products for healthcare and welfare organisations across the world, including our detergent sanitiser tablet upon which Cert. is based.

For many years we have manufactured a large proportion of the NHS' detergent sanitiser tablets – which contain the same dilute formula as Cert. I'm delighted that we can now provide the same level of hospital-grade hygiene to you, your family and the wider community.

Robin Rough
Managing Director,
Hydrachem Ltd, the Manufacturer of Cert.

*CERT has been evaluated for virus-inactivating properties against all enveloped viruses (a group to which SARS-Covid-2 belongs), under standard EN14476:2013 +A2:2019 and passed the test (inactivation $\geq 99.99\%$) at 1 min contact time. The strain used was modified vaccinia virus Ankara, surrogate of SARS-CoV-2 as stipulated under Appendix 3, Guidance on the BPR: Volume II Parts B+C Version 3.0 April 2018.

Cert. is both a disinfectant and detergent, so you can use it in place of your current household cleaner, safe in the knowledge that Cert. kills 99.99% of microorganisms and household germs and destroys the SARS-CoV-2 virus, which causes COVID-19.

Like all powerful cleaning products Cert. needs to be treated with care. We recommend you clean with Cert. regularly and use the Cert. Trigger Spray and Cert. Spray Mop with your Cert. tablets.

How to use the Cert. Trigger Spray

1. Fill the spray bottle with 500ml of tap water (to the neck of the bottle). Drop in 1 Cert. tablet. Wait a few minutes for the tablet to fully dissolve (the water will be completely clear of tablet particles). Gently shaking the bottle will help the tablet to dissolve more quickly. Your hospital-grade cleaning solution is now ready to use.

2. Cert. is optimised to be used on hard surfaces in kitchens, bathrooms and all general living areas and workspaces. Once the Cert. tablet has fully dissolved, clean loose debris from surfaces and spray evenly onto the surface.

3. Using a clean cloth gently wipe the surface to ensure the solution is spread across the whole surface, taking care not to wipe the solution off with the cloth. Leave the solution on the surface for 5 minutes, after which time it can be left to dry.

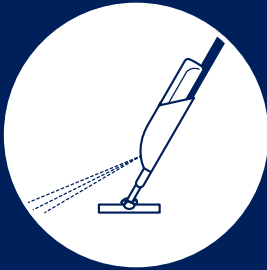

4. For direct food contact surfaces, such as chopping boards, rinse surface with clean water after 5 minutes and allow to air dry or wipe with a disposable paper towel.

5. Your Cert. is active for 48 hours. Dispose of any leftover solution into a toilet bowl and flush.

How to use the Cert. Spray Mop

1. We recommend you use the Cert. Spray Mop. If you are using your own mop, use 1 Cert. tablet for every 500ml of tap water. Wait a few minutes for the tablet to fully dissolve (the water will be completely clear of tablet particles).

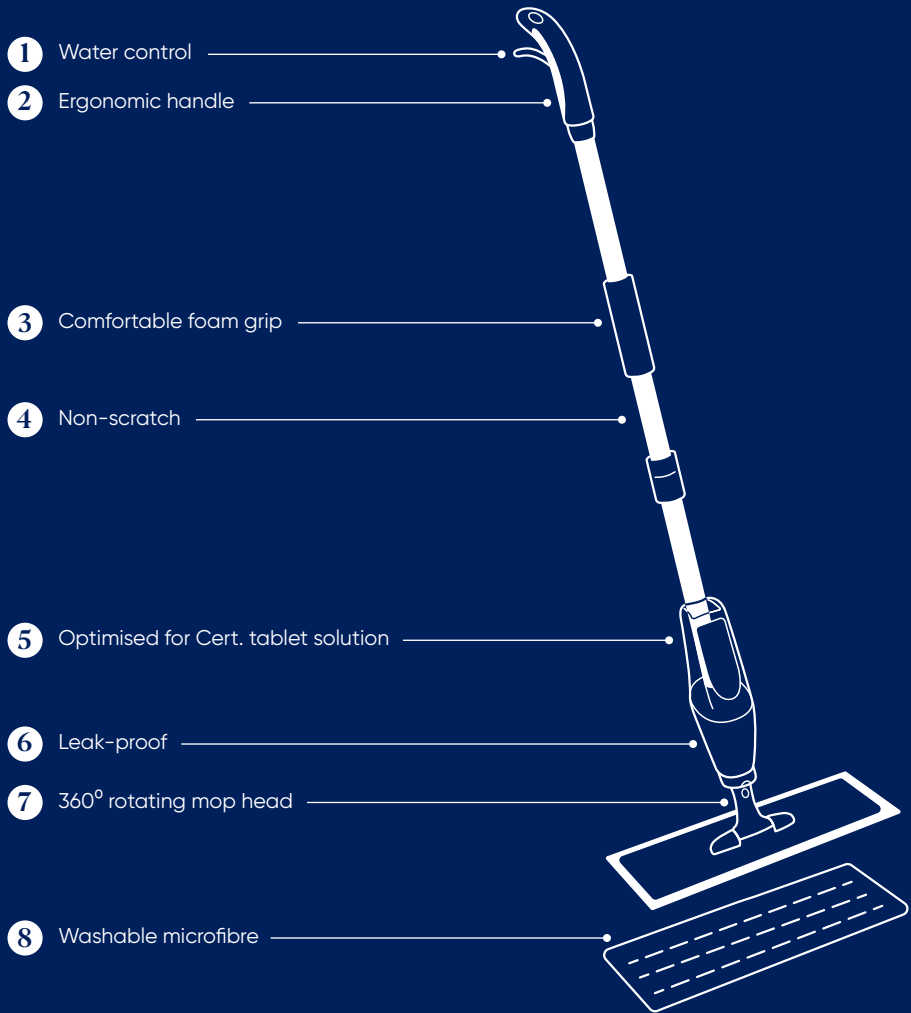

2. Once the Cert. tablet has fully dissolved, sweep loose debris from the floor and spray evenly onto the floor. Use the mop head to spread the solution evenly across the whole floor, taking care not to wipe the solution away with the mop head.

3. Leave the solution on the floor for 5 minutes, after which time it can be left to dry.

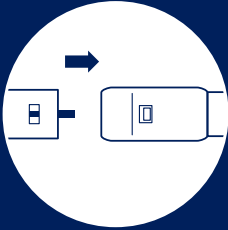

Cert. Spray Mop

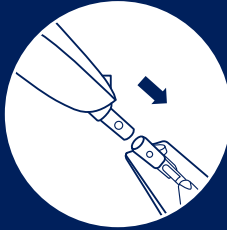

Hospital-grade hygiene
Precision water-saving design

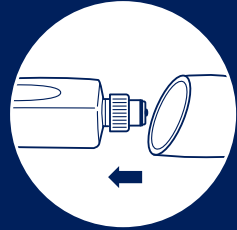

Assembly

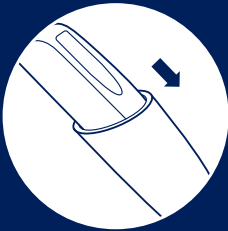

1. Insert the upper handle into the lower handle until it clicks.

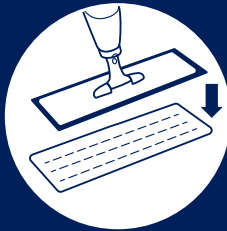

2. Insert the lower handle into the footplate until it clicks.

3. Remove the water tank by pulling it out of the holder towards the handle.

4. Fill the tank with water, add a Cert. tablet then slide the tank back into the holder.

5. Attach the microfibre pad to the bottom of the footplate and press down gently.

- Includes one super-absorbent fine-microfibre pad
- Machine wash at 40°C
- Do not use bleach or fabric conditioners
- Air-dry only

PLEASE NOTE

- After each use, pour clean water into the tank and activate the spray a few times to avoid the spout clogging.
- Do not use fabric conditioner when washing the microfibre pad.
- Do not disassemble the Cert. Spray Mop once it has been assembled.
- Prolonged direct sunlight can damage the Cert. Spray Mop.

Cert. outside the home

You'll want to know that other locations are as clinically clean as your home, and that they too meet the Government's COVID-19 cleaning guidelines. That's why we're introducing Certified By Cert, which will enable offices, coffee shops, cafes and other businesses to communicate to staff and customers that they use Cert. to keep them safe.

We envisage there will be a certificate that businesses can place prominently in their offices and customer-facing areas, which they can publicise via social media and Google maps. On it is a unique code which guarantees they are using Cert. and have the correct amounts of stock to continue providing hospital-grade hygiene for their customers.

Customers will be able to check if a certificate is still valid via the unique code published on the certificate. www.certcleaning.com/check
