HAND SANITIZER STATIONS

“For a clean and healthier environment”

Our story;

Being in **trade show** and **retail** visual brand implementation industry for over 15 years, we were fortunate enough to learn a thing or two about finding the right balance among design, fabrication, look, efficiency and making it happen for the right price for our clients.

Since March 2020 when the world of ours got hit with the never before seen crisis of Pandemic, our industry was one of the worst hit.

We had to change our course in order to keep our talent and years of experience alive. We started assessing the current climate, and try to divert our attention on what we can do on our end for the new requirements of our new lifestyle, new norms.

Like most of us, we have seen and used the existing Hand Sanitizer Stations that are available on retail outlets, public places, restaurants, hospitals. Most of these stations were designed prior to current **Covid-19** pandemic, therefore designed mostly for lighter duty usage, not purposed for every single person visiting the premises to use them. Our experience over the last few months showed us that most of the existing hand sanitizer stations we encounter on our daily lives, do not work properly; either the sanitizer liquid runs out due to low capacity containers, batteries deplete or mechanisms fail.

Above experiences lead us to go back to the drawing board and focus on what we know the best, so we created **SANITAME**, a highly durable commercial grade hand sanitizer station for high traffic usage, which requires no maintenance, efficient, versatile and fully customizable with graphics, special colors and branding possibilities.
