CH-5 & CH-10 CHEETAH® BEAD SEATER

CH-5
Available in aluminum or steel

CH-10
Available in aluminum or steel

PRODUCT FEATURES

The **CH-5 Steel Tank Cheetah® Bead Seater** and the **CH-5AL Aluminum Tank Cheetah® Bead Seater** makes seating the most difficult bead not only safe, but simple, fast and economical. A 1½" tank opening allows use of the optional Magnum I Barrel giving added "spread" of the discharge. As the most popular tire bead seater models, the CH-5 and CH-5AL have 5 gallon ASME certified tanks designed for commercial use on all tires from small 4" tires to 24.5" truck tires.

For larger tire applications the **CH-10 Steel Cheetah® Bead Seater** and the **CH-10AL Aluminum Tank Cheetah® Bead Seater** are available. The CH-10 and CH-10AL are equipped with an 10 gallon ASME certified tank that features a larger discharge capacity. A 2" tank opening allows use of the optional Magnum II Barrel giving added "spread" of the discharge. This extends the power of the tank for seating even the most difficult beads on larger diameter wheels. The CH-10 and CH-10AL are designed for all tires including larger truck tires and small off highway tires.

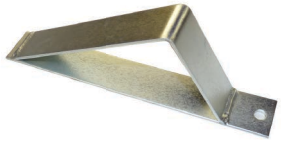
CH-5 & CH-10 CHEETAH® BEAD SEATER

ACCESSORIES

1) #01.109

2) #6348



3) #01.111

4) #6411

5) #02.106

6) #03.106

1. CHEETAH® TIRE HOUSE ASSEMBLY
Our flexible air hose assembly is designed to give the Cheetah® Bead Seater operator the ability to manually control the air flow from the air compressor to the tire valve stem. The air hose assembly further assists the operator in reaching those difficult to reach valve stems.

2. CHEETAH® TIRE WEDGE
Designed to help place the lower sidewall of the tire in an optimal seating position. The tire wedge is highly effective and recommended when seating soft sidewall off highway tires.

3. CHEETAH® UNIVERSAL TIRE STAND
Designed to elevate the wheel when seating the bead. Elevating the wheel helps to ensure positive seating of the bottom tire bead. The Cheetah® Tire Stand legs are equipped with rubber strips to protect wheels from damage.

4. CHEETAH® HEAVY DUTY TRUCK & TRACTOR TIRE STAND
Designed to elevate larger wheels when seating the bead. Elevating the wheel helps to insure positive seating of the bottom bead. The Cheetah® Tractor Tire Stand legs are equipped with stepped rubber strips to protect wheels from damage.

5. CHEETAH® MAGNUM I BARREL
designed to increase the impact power of the CH-5 by 2 to 3 times over the standard barrel. The Cheetah® Magnum I Barrel spreads the air discharge over a larger area to provide optimum air dispersion.

5. CHEETAH® MAGNUM II BARREL
Designed to increase the impact power of the CH-10 and CH-10AL by 2 to 3 times over the standard barrel. The Cheetah® Magnum II Barrel spreads the air dispersion over a greater area and provides optimum tire bead seating.

SHIPPING SPECIFICATIONS:

CH-5: 18” x 14” x 14”; 30 lbs shipping weight
CH-5AL: 18” x 14” x 14”; 18 lbs shipping weight
CH-10: 24” x 16” x 15”; 46 lbs shipping weight
CH-10AL: 24” x 16” x 15”; 29 lbs shipping weight
MAGNUM I: 20” x 9” x 4”; 3 lbs shipping weight
MAGNUM II: 36” x 5” x 2”; 5 lbs shipping weight
