PRODUCT FEATURES

- The **STE-M Tire Siper** allows the operator to sipe both non-mounted and mounted tires with the same machine.
- For non-mounted tires, expandable rims are available 13" to 24.5" to fit over standard expanding hub of the STE-M Tire Siping Machine.
- For mounted tires, the expandable hub is swung out of the way; the wheel is fitted with the necessary adapter and rolled into the machine and siped.
- A tire can be mounted, siped and dismounted in as little as 4 minutes depending on tire size.
- Most types of tires can be siped – new, re-cap, or used – as long as it has 5/32" of tread left. It's easy to operate and training is provided.
- Drivers everywhere are asking for tire siping because it's proven ability to increase overall tire performance. If you are not offering tire siping you're losing money and possibly customers.

NOTE: THIS PRODUCT REQUIRES ADAPTERS, SOLD SEPARATELY
