

SC-99 STRIVER TOOL™

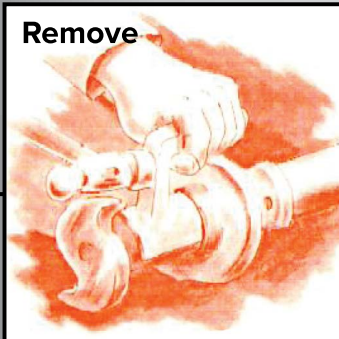

PRODUCT FEATURES

The innovative **SC-99 Striver Tool™** seal and bushing driver makes S-camshaft maintenance quick and easy. The Striver saves time and prevents damage to bushings and seals. It provides a uniform edge that slips under the S-Camshaft housing and butts against the bushing; it then drives the bushing out cleanly with a few taps on its handle.

The Striver also bypasses the need to remove outboard hubs. With the Striver, the S-Camshaft can slip out of the housing to receive a new bushing. Additionally, the technician can replace the bushing by tapping the Striver's handle, instead of the bushing, which eliminates risk of seal damage. The Striver fits S-Camshaft diameters from 1 1/4" to 1 5/8".
