

BATTERY SAFETY

DO NOT CARRY LOOSE BATTERIES AROUND IN YOUR BAG OR POCKET. USE A CASE

MAKE SURE THE WRAPPING OF YOUR BATTERY IS INTACT

DO NOT USE A DAMAGED BATTERY

STORE BATTERIES IN A CASE WHEN NOT IN USE

DO NOT LEAVE BATTERIES CHARGING UNATTENDED

DUAL BATTERY DEVICES: USE THE SAME BATTERIES & KEEP THEM IN PAIRS

DO NOT EXPOSE YOUR BATTERY TO EXTREME HEAT OR COLD

DO NOT LET YOUR BATTERY COME INTO CONTACT WITH WATER

CHECK YOUR BATTERY'S AMP LIMIT IS COMPATIBLE WITH YOUR DEVICE

It is important to follow the advice above to ensure your batteries are safe to use. The advice is not exhaustive and we advise you to conduct your own research into battery safety and in respect of the specific device you are using.

If you are unsure of any aspect of the points raised, please speak to a member of staff or contact our customer service team.

BATTERY SAFETY

- DO NOT STORE LOOSE BATTERIES IN YOUR POCKET OR BAG.
- THE PLASTIC WRAP ON YOUR BATTERY SHOULD BE FULLY INTACT AND FREE FROM ANY RIPS OR TEARS. EXPOSED AREAS OF THE BATTERY POSE A RISK OF SHORT CIRCUIT SO DO NOT USE A BATTERY WITH ANY DEFECTS TO THE WRAP.
- WHEN NOT IN YOUR DEVICE OR CHARGER, BATTERIES SHOULD BE SAFELY STORED IN A PROTECTIVE CASE OR SLEEVE. THIS WILL PROTECT THE BATTERY FROM SCRATCHES, KNOCKS AND DENTS BUT MORE IMPORTANTLY WILL STOP IT COMING INTO CONTACT WITH ANY METAL OBJECT THAT COULD LEAD THE BATTERY TO SHORT CIRCUIT. A SHORT-CIRCUITING BATTERY IS EXTREMELY DANGEROUS AND POSES A HIGH RISK OF FIRE AND/OR EXPLOSION.
- ENSURE YOUR BATTERY HAS A SUFFICIENT AMP RATING FOR THE WATTAGE AND COIL RESISTANCE YOU ARE USING. THIS IS ESPECIALLY IMPORTANT ON SUB-OHM COILS AND HIGH WATTAGE OUTPUT. OHMS LAW CALCULATORS CAN BE FOUND ONLINE OR SIMPLY SPEAK TO A MEMBER OF OUR TEAM.
- DO NOT USE A BATTERY THAT SHOWS ANY SIGNS OF LEAKING. IF YOU COME INTO CONTACT WITH ANY BATTERY ACID, THOROUGHLY WASH YOUR HANDS AND DISPOSE OF THE BATTERY SAFELY.
- DO NOT EXPOSE YOUR BATTERY TO EXTREME HEAT OR COLD. DO NOT CHARGE YOUR BATTERY IN HOT OR COLD TEMPERATURES OR IN DIRECT SUNLIGHT. DO NOT ALLOW YOUR BATTERY TO COME INTO CONTACT WITH MOISTURE.
- IF YOUR DEVICE USES TWO OR MORE BATTERIES, THE BATTERIES SHOULD BE KEPT IN 'MARRIED PAIRS'. THIS MEANS TWO OF THE SAME BATTERY THAT ARE ALWAYS USED AND CHARGED TOGETHER. THIS ENSURES BOTH BATTERIES WORK AT THE SAME RATE WHEN IN YOUR DEVICE. NEVER SPLIT UP A MARRIED PAIR AND USE THEM INDEPENDENTLY.
- DO NOT LEAVE BATTERIES CHARGING OVERNIGHT OR UNATTENDED.

THE SAFETY ADVICE GIVEN IN THIS DOCUMENT IS TRUE OF ALL BATTERIES, NOT JUST THOSE FOUND IN VAPE DEVICES. IN FACT, THE BATTERIES USED IN VAPE DEVICES CAN ALSO BE FOUND IN LAPTOPS, TORCHES, POWER TOOLS AND EVEN ELECTRIC CARS. WHEN USED AND HANDLED CORRECTLY THESE BATTERIES ARE SAFE AND PROVIDE AN EXCELLENT POWER SOURCE FOR PORTABLE DEVICES.
