These configurations show your typical workstation sizes, but there are thousands of sizes and configurations available, depending upon the inventory available, and manufacturer.

This questionnaire is intended to be a tool that provides us the details that we need in order to understand what you are trying to accomplish. There are thousands of options on the market, but the actual options available will be depending upon:

\*budget

\*current pre-owned inventories available at the time of sale

\*If not pre-owned, then which product is being used for re-manufactured, or new. New will always provide the most variety of selection, but will also be the more expensive. The more flexible that you are with the pre-owned options, the more cost savings there will be.
