

 **GUNSKINS**[®]
PROTECTION IN CAMOUFLAGE

I carefully nestled into the rough sage and timber located at the base of a rocky bluff. Sunrise had yet to come up on this particular January morning, my first hunt of the year. I was ready, my call and decoy were located just where I wanted them. I briefly saw the blur which was a coyote dashing through the sage not 600 yards away. This was going to be an easy one, I thought to myself.

Boy was I wrong. About 400 yards out he suddenly stops and looks at my direction. I aimed my rifle, but it was too late. He was gone. I was decked in camouflage from head to toe, concealed to the environment and in perfect position. Then the painful answer was obvious when I inspected my weapon. My AR-15 featured a stainless barrel and scope, which is great for durability but the sun must have hit it and given my position away.

This enjoyable but unsuccessful adventure is what got the wheels turning towards the creation of the GunSkins product line. We wanted to create something that would provide an economical and versatile concealment solution as well as take the abuse that comes with day-to-day use. A quality American made product that is applicable to both the tactical shooter and the traditional hunter. GunSkins are made of premium vinyl, specifically designed for durability, conformability, and ease of application.

The material can be removed or layered, allowing for adaptation to different environments. We offer over 40 officially licensed patterns and 15 unique templates to accommodate any weapon or accessory. GunSkins is centered on the desire to provide our customers with the best solution to their concealment needs, provide outstanding customer service, and guarantee a positive experience with our products.

GUNSKINS

For those of us who live to hunt, shoot, and protect, there is no end to the gear needed. We spend hundreds and thousands of dollars on boots, jackets, pants, back packs, mag carriers, and body armor. Then we grab our weapon of choice and head out into the world with it exposed and unprotected; a grievous act of neglect you need not commit any longer!

GunSkins are protective camouflage vinyl wraps that can be applied to any weapon platform or tactical gear. We offer templates with precut pieces that are weapon specific to allow for a simple, do-it-yourself install by the end user. They are 100% waterproof and have a non-reflective matte finish. GunSkins conform to any shape and are easy to install. They are removable and leave no residue behind. Look for them in a variety of tactical, hunting, and specialty patterns.

AR-15 Rifle Skin

The AR-15 was a revolutionary design when it was first introduced, and has become one of the most popular weapons in the world. Proven combat performance, light weight, clean lines, and all black everything are the defining features of this infamous weapon system. It's endless supply of parts and pieces can be easily changed or adapted to meet the operator's needs or wants. We set out to create a weapon concealment solution just as versatile and adaptable.

The AR-15 Rifle Skin is a high-performance vinyl coating that provides a layer of protection, concealment and personalization. The Skins are easily removable and have no affect on the weapon finish. GunSkins AR-15 Skins are designed to fit any AR-15 Rifle or M4 Carbine. The kit includes pieces for the upper and lower receiver, pistol grip, magazine, picatinny rails (up to 16"), plus enough additional material for the forend, stock, and other accessories.

Rail Skin

Picatinny rails are a welcome addition to any weapon system. They allow us to attach optics, lights, slings and countless other things we want but don't need. In the world of GunSkins, rails are a blessing and a curse. Could you wrap the rails without our precut Rail Skins? Absolutely, but this time consuming process may cause you to want to slam your head in a car door. To keep things simple and to prevent you from injuring yourself, we created precut Rail Skins that can be easily installed.

GunSkins Rail Skins are designed to fit any picatinny rail system. The kit includes four rows, each measuring 16" in length. The pieces apply to the rail system in a ladder shape, dropping into every contour giving the rails a seamless look.

Magwell Skin

The lower receiver of an AR-15 is truly the foundation for the weapon platform, at least in the eyes of the ATF. I have to give my fingerprints to legally purchase this hollowed out piece of aluminum, but I can have the remaining parts and pieces delivered to my door step. I'm not complaining, it's just humorous.

GunSkins Magwell Skins are the perfect way to accent this centerpiece of the AR platform. The pre-cut pieces for the right and left side of the lower allow for a truly simple application that can be completed in less than 10 minutes. Magwell Skins fit any AR-15, but can also be used on the AR-10.

AK-47 Rifle Skin

The AK-47 is one of many variations in the Kalashnikov family. Each variation has its own characteristics but they are all simple and reliable. The AK has been around for almost seven decades and is the most popular and readily available assault rifle in the world. These weapons are cheap as dirt and twice as ugly. We want to help you make this diamond in the rough a bit more aesthetically pleasing.

Our AK-47 Skin will fit all variations of the Kalashnikov family and provide a layer of protection, concealment and style. The kit includes pieces for the receiver, dust cover, pistol grip, magazine, plus enough additional material for the forend, stock, and other accessories.

Pistol Skin

Pistol, handgun, piece, strap, heater, pocket rocket, gat or smokewagon! Whatever you call it there is no denying that they are one of the most useful weapons available today. Easy to conceal and quick to deploy when needed, these handy tools are an obvious choice for those of us that carry daily.

GunSkins Pistol Skins fit any pistol and provide a layer of protection from the wear and tear of daily use and abuse. Your blaster is a gunsafe princess you say, well then, a Pistol Skin is just what you need to add a touch of "Bad A" to your show piece. Next time you crack open that climate controlled castle to show your buddies all the precious gems you have collected, make sure she shines all dressed up in a Pistol Skin!

Pistol Accent Skin

Sometimes less is more. If you're not sold on the idea of wrapping the entire handgun, consider adding just a touch of color, camo, or the stars and stripes! Pistol Accent Skins require minimal trimming for the slide, but everything else is as easy and peel and press. The pistol grip and base plates for the magazines are covered using our pre-cut templates.

GunSkins Pistol Accent Skins come in a variety of sizes, including the Glock platform and the 1911. For most other semi-automatic models, the Glock variant is generic enough that it will fit and can be trimmed to shape if necessary. That's the beauty of these DIY kits, it's up to you to decide just how much or how little to wrap.

Rifle Skin

Used for everything from vaporizing squeaks on the back 40 to taking out terrorists from a mile out, rifles vary as much in size and style as in their uses. The performance requirements of a rifle often determine the style of stock, barrel length, action or caliber. All these choices can make it hard to decide on just one.

In the spirit of simplicity we designed a universal Rifle Skin that fits them all. Designed to fit any rifle with a barrel length up to 29", the kit includes pieces for the receiver, forend, stock, and barrel. For irregular shaped stocks, or scopes please consider our **Gear Skin** or **Scope Skin** for additional material.

Scope Skin

Similar to our Gear Skin, the Scope Skin is a single sheet that can be trimmed to fit any surface. As the name suggests, a good candidate for wrapping is indeed your rifle's optics. It doesn't take a genius to figure out that it's good to match your scope to your rifle, but you can be creative and mix and match if you want to. We won't judge you.

GunSkins Scope Skins measure 8" x 15", enough for any optics. Because of the generic properties of the Scope Skin, they are useful as a supplement to any other kit if more material is required to finish the job. Likewise, they are also perfect for wrapping other small accessories such as binoculars, range finders, cameras, and anything else you can think of. Let your imagination decide what can or cannot be wrapped.

8"

15"

Shotgun Skin

The shotgun has served many purposes throughout history from trench warfare to hunting. The shotgun comes in a variety of shapes, sizes and actions. Double barrel, pump, semi automatic and lever actions are all available in the shotgun platform.

Whether you are dumping ducks in a marsh or defending your home, GunSkins Shotgun Skin will fit your needs. Shotgun Skins come in a variety of camouflage and tactical patterns and provide a layer of protection against daily use and harsh weather conditions. Designed to fit any shotgun with a barrel up to 29", the kit includes pieces for the receiver, forend, buttstock, and barrel.

Gear Skin

Looking to wrap out your AR-10, AICS 338, Lapua, MP5, laptop, cell phone, sunglasses, flask, whips, chains, whistles, yo yos, etc? Gear Skins are the answer to this question. There is no end to the shapes and sizes of weapons and accessories on the market today. Gear Skins provide bulk sheet material that can be trimmed to fit literally anything you want to protect and camouflage.

Gear Skins come in three sizes: 8" x 15", 8" x 50", and 24" x 50" to give you the best fit for your project size.

MAG SKINS

The magazine is the very soul of the gun. Without these willing keepers of the bullet, the once efficient tool in the hands of the operator is but a hollow noise, it is literally empty.

Mag Skins provide a simple and economical way to protect, and identify your magazines. Our pre-cut templates make installation quick and easy. Simply clean the surface, peel and press, then add heat to conform and set the Skins. Mag Skins are available in over 30 officially licensed camouflage patterns and 20 specialty patterns.

AR-15 Mag Skin

As gun owners we are drawn to 30 round mags like a Bro to a protein shake, we crave them, we need them. Shoot I might even go so far as to say that we swell up as we consume more of them.

GunSkins AR-15 Mag Skins are available in over 40 patterns and are the perfect way to help you protect and identify your AR mags. AR-15 Mag Skins are available in a 3 Pack, but also come in Singles for those of us that love a mixed and matched yard sale of nonsense and need one of every pattern.

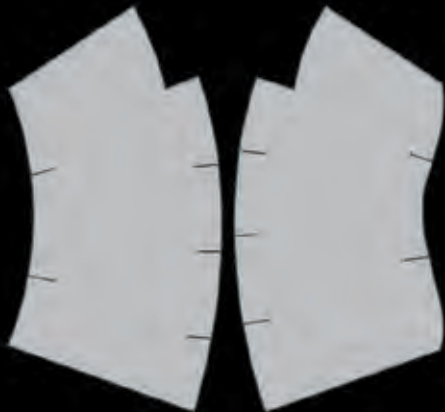

AK-47 Mag Skin

The AK mag is a unique and interesting creature. With a style clearly inspired by a banana or a boomerang, they efficiently deliver rounds to their simplistic host.

GunSkins AK-47 Mag Skins provide a truly simple way to protect and identify AK mags. Our pre-cut templates make installation quick and easy. Simply clean the surface, peel and press, then add heat to conform and set the Skins.

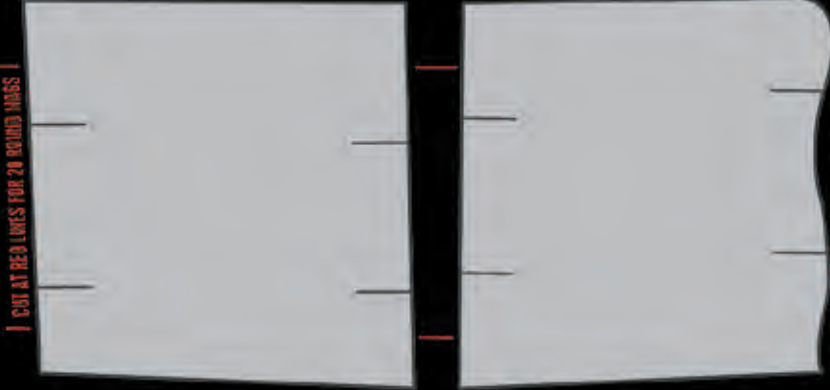

AR-10 Mag Skin

Some people are just born to swing for the fences. You take the saying, "Walk tall and carry a big stick," a bit more literally than the rest of us. For the heavy hitter, the AR-10 platform is the only way to go, and we have you covered.

AR-10 Mag Skin are available in a variety of patterns and will fit 20 and 25 round mags.

CUT AT RED LINES FOR 20 ROUND MAGS

CUT AT RED LINES FOR 25 ROUND MAGS

Grip Assist

"A gun is a tool, no better or worse than the one who holds it."

Though this quote is more of a moral statement, there is a practical operational truth to this thought process as well. In the world of guns, a proper grip is one of the most important aspects of an efficient and accurate shooter. There is no replacement for consistent training, but any advantage that can be given to the operator should be pursued. Natural elements, fatigue and stress can all affect the operators hold, these factors have lead to the development of GunSkins Gript Assist.

GunSkins Grip Assist™ is a liquid grip additive that can be applied over GunSkins or directly to the weapon, providing a safer, more efficient, shooting experience. From competition shooters to duck hunters, Grip Assist gives you a solid performance grip without the bulk or hassle of traditional tape. Grip Assist is a permanent grip finish that will not peel or crack. You control the grip texture by simply adding more or less to accommodate your grip performance needs.

HOW TO INSTALL GUNSKINS

CLEAN THE GUN

Use a gun-specific degreaser to remove all dirt, debris, and gun oil from the surface. Even new guns require surface prep. We recommend FrogLube Solvent.

Scrub the recessed edges with a small brush. Dissassembly is not required. Wipe clean using a lint free cloth or air dry for best results. A clean gun makes for a clean install.

PEEL AND STICK

Peel off and place the material where you want it. Reposition as many times as necessary and use your fingers to smooth on the surface. A hand squeegee can be helpful for working on the hard-to-reach areas.

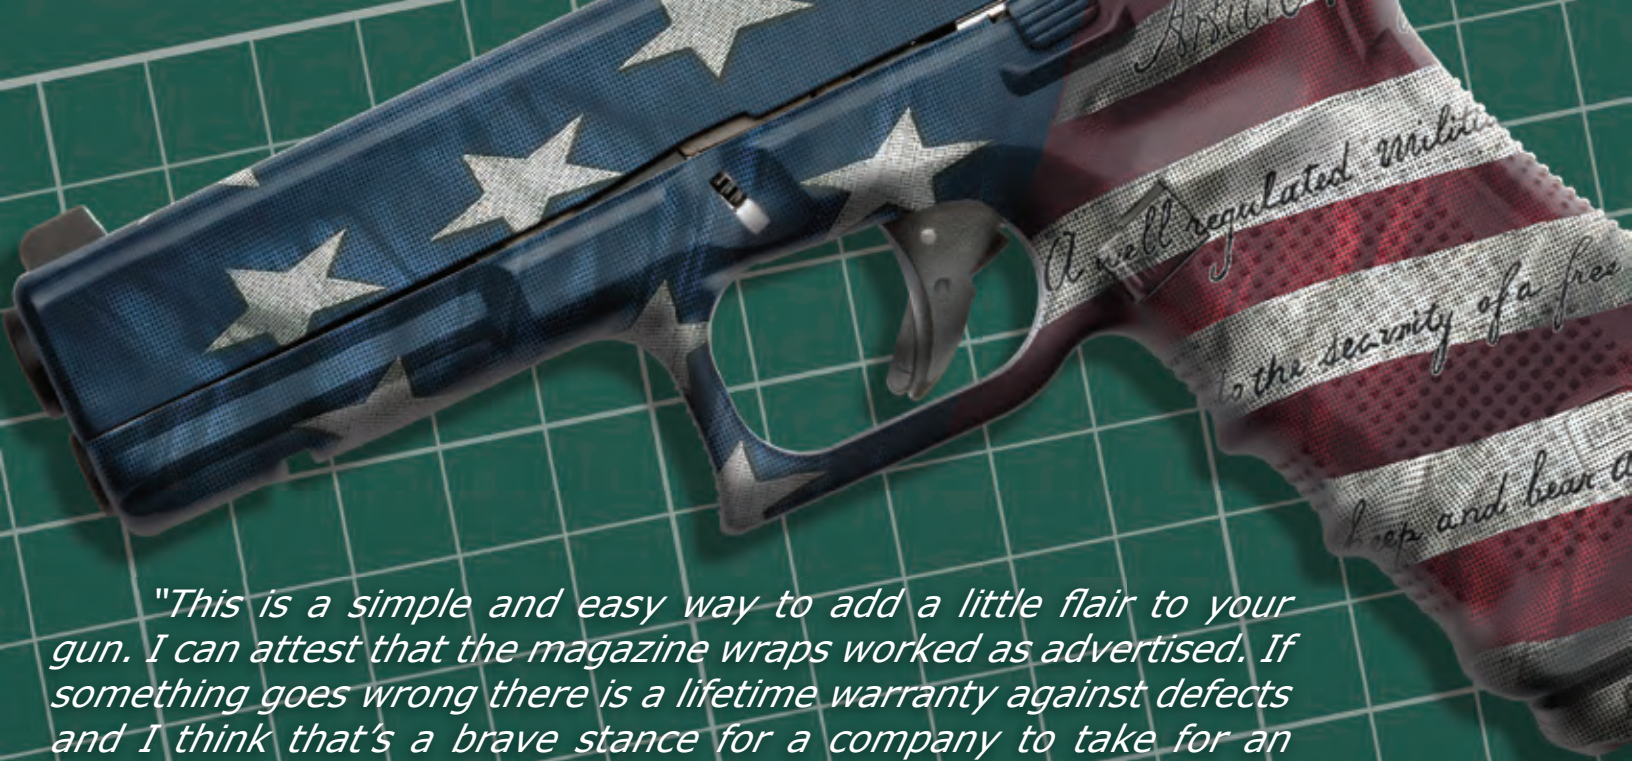

Start from the center and work your way outward, releasing any trapped air and pulling away from the tension to preventing wrinkles. Take your time.

HEAT AND TRIM

Trim away any excess material using a sharp hobby knife with plenty of extra blades at the ready. Overlap where necessary and stretch the material to conform to the shape of the gun.

Hit the surface with a heat gun to make the vinyl pliable and press firmly. Wait for the surface to cool if more trimming is required. Post heat to seal the deal.

"This is a simple and easy way to add a little flair to your gun. I can attest that the magazine wraps worked as advertised. If something goes wrong there is a lifetime warranty against defects and I think that's a brave stance for a company to take for an aesthetic upgrade. They aren't for everyone, but they are for me."

TRAVIS PIKE

Author of The Loadout Room.

"GunSkins solve a lot of finish related issues. First, they protect gun finishes. If you install a GunSkins on a brand new weapon, the finish will be as new when you peel the Skins off. Second, they are the perfect solution for people wanting to camouflage their guns without impacting their value. Third, they are wonderful for people who change their minds about camouflage or like to add accessories."
