

Game Changer!

With all the handwashing and sanitizing we've been doing for the better part of a year, my hands are in rough shape. I've tried many different types of sanitizers, all of which dried out my skin and had me moisturizing like a fiend. Then, along came this plant-based moisturizing hand sanitizer from Babington Soap Co. It is nothing like any other product I've tried. You can read all about what makes it unique on their website, but I will tell you this: **My search is over. My hands are soft AND 99.9% germ free.** I've already ordered more and the travel sized bottle will be in my bag when we can travel again.

For lucky US residents, shipping is free. Get all the details and order info here:

[Babington Soap Co.](#)

*We have no relationship with this company other than the fact that Tracey tried a free sample. We just like to let you know when we find something we love and use ourselves.
