

# PROFESSIONAL

# SCRUM MASTER and PRODUCT OWNER

A Professional Scrum training course created by Ken Schwaber, Scrum.org, and the Professional Scrum Trainer Community

The Scrum.org mission is to improve the Profession of Software Delivery.

As part of our mission, Scrum.org provides the highest quality Scrum training, including the most advanced training materials and certified Professional Scrum Trainers (PSTs) to deliver it. The curriculum and courseware are highly-tuned and standardized.

Training materials are created and maintained by Scrum co-creator Ken Schwaber with the Scrum.org PST community, helping to ensure that they are always in tune with what's happening in software development organizations and always up-to-date with the latest practices.

Courses are provided around the world. Our PSTs can work with you to plan a private course to meet your organization's specific needs. For globally distributed organizations, our PSTs work together to provide training for your staff wherever they reside, ensuring that they are all learning the same thing. Consistent training is critical for large scale efforts where many teams are working together on the same products.

Our trainers bring their own style and experience to courses, but all trainers use the same materials around the world so that students are learning from the same content regardless of where the course is taught and who is teaching it.

## Course Objectives

Students are challenged to consider how the Scrum framework will work in their specific organization. This allows the participants to maximize the value Scrum can provide when returning to their workplace and faced with complex product decisions and difficult work scenarios.

Have a clear understanding of the mechanics of Scrum from the perspective of the Scrum Master and Product Owner role.

Students learn how to effectively increase the business agility of their organization.

Students receive an in-depth understanding of servant-leadership to improve their abilities for working with Scrum Teams and stakeholders

## Course Description

The Professional Scrum Master and Product Owner course combines all the learning objectives in two of Scrum.org's most impactful 2-day courses and delivers them in a single fast-paced 3-day offering. By removing the duplication that exists between these two individual courses, the participants can not only speed up their learning, but they can build a tight bond between the Product Owners and Scrum Masters in an organization.

Being a professional Product Owner encompasses more than writing requirements or managing a Product Backlog. Product Owners need to have a concrete understanding of all product management aspects, including but not limited to product ownership, that drives value from their products.

For Scrum Masters coaching a software development team, this course will move you towards increased efficiency and effectiveness. The course includes advanced thinking for servant-leadership and behavioral shifts.

The 3-day PSM/PSPO course is much more than just a set of slides and an instructor. In this course, students work on real-life cases with other classmates together as a team. This course is made up of discussions and hands-on exercises based upon real-life cases.

## Who Should Attend?

The 3-day Professional Scrum Master/Product Owner course is for individuals from the same organization who are looking to learn about the Scrum framework specifically from the perspective of a Scrum Master or Product Owner.

## Course Topics

- Agile Product Management
- Value-Driven Development
- Product Backlog Management
- Scrum Theory & First Principles
- The Scrum Framework/
- Release Planning
- Done & Undone
- People & Teams
- The Scrum Master

## Assessment Certification

All participants completing the Professional Scrum Master course will receive a password to attempt the PSM I and PSPO I assessments, and are also entitled to a discount on the PSM II and PSPO II assessments. These industry-recognized certifications require a minimum passing score on these rigorous assessments.
