# HEPACROWN P/N: HC

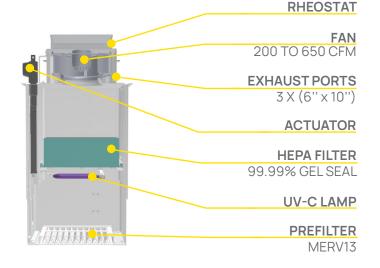

The HepaCrown is a retractable ceiling-mounted column specifically designed with hospital isolation rooms for contagious patients in mind. Not only will it create a code compliant negative pressure environment, but its source capture also limits the spread of aerosols (COVID-19) in the room using HEPA filtration and UV-C decontamination.

- Ceiling-mounted
- Adjustable height (from 33.5" to 49.5")
- Electrical: 115V@60Hz/1PHASE
- Internal fuse:
  6A
- Weight: 150 lbs

- Source capture design
- Room side replacable HEPA filter
- Material: Filter housing: Aluminium Anchoring: Stainless steel
- Antimicrobial paint: White: RAL 9003

## **OPTIONS**

#### WMR

A wall mounted rheostat to control fan speed.

### KSH

**KSH.A** - A wall mounted plate with key switch and hour meter that shows the hours of operation.

**KSH.B** - Option KSH.A with a button that switches from low/automatic to high speed (650 CFM) when necessary (bypasses the rheostat) and increases the number of ACH.

### RCP

Wall mounted differential pressure gauge to show the appropriate time to change the HEPA filter.

### FMS\*

Allows the HepaCrown to be controlled by an air differential pressure monitor. The unit is designed to work with the speed set by the rheostat on the machine until the air pressure monitor senses a loss of negative pressure. At this point the monitor sets the HepaCrown to run at a higher speed (650 CFM) in order to compensate for the loss of negative pressure and increases the number of ACH.

\*This option is only available with option KSH.B.

### ACCESSORIES

#### SCA

Source capture arm and fan (100 CFM)

#### A24

Ceiling trim to cover 24" x 24"
