Wearing

Remove the Earplugs

Pinch the earplug and rotate back & forth gently until earplug has been removed off the shaft.

Earplugs

Note: Recommended to use a larger size earplug when shooting for better Hearing Protection.

Reconnection

The earphones will reconnect to the device when you're back into the working range after distance break.

Once the earphones are paired to the device, it will reconnect automatically on second time usage.

Note:
If it cannot reconnect to your device, please turn on the device pairing function, select the Grizzly Ears 46 to connect again.

If you still cannot do the reconnection, please delete the pairing record on your device, do the set up again.

Reset

Off-stage earphones, press both earphones and hold for 5-8 seconds until you see pink light or heard short 3 beeps. (operation to delete the internal pairing)

LED: blue – red – pink

Voice: power on – power off – beep beep beep

Turn on the earphones, wait for 5-10 seconds to let the earphones pair by themselves (operation to build up the internal pairing).

LED: blue – red/blue – blue – red/blue just on right earphone

Voice: power on – b – b ... - left connected/right connected - pairing

Quick reference & trouble shooting

1. No need to power off earbuds just put back into charging case and close.
2. When taking out earbuds from charging case, earbuds will automatically connect to device once it's already sync to your device. If charging case needs to be charged...earbuds might have powered off to save power. Just press down both earbuds 2-3 seconds to until you hear power on.
3. If one earbud is only working press and hold the earbud not working for 2 seconds until you hear power on and then both earbuds should sync to device
4. If you're in amplify press once to exit amplify mode before placing back into charging case
5. If you only want amplify with shot compression and not Bluetooth then turn off Bluetooth on your device and double press earbuds to activate amplify with shot compression. If you turn Bluetooth off on your device...it will give you longer battery charge up to 5 hours for amplify/shot compression.
6. You must be in amplify mode in order for shot compression to work.
7. If you're using lanyard & you want to just hang earbuds around neck...make sure you power off conserve battery. Push down for 6-8 seconds until you hear power off. To turn power on press both earbuds 2-3 seconds at same time until you hear power on.
8. If you hear beeping in one earbud...it means one earbuds is off and trying to sync to the other earbud. Press the earbud that's not beeping for 2-3 seconds until you hear power on.
9. You only have to push 1 earbud for 6-8 seconds if you're powering off earbuds.

Maintenance

- Do not use abrasive cleaning solvents to clean the headset.
- Do not allow the headset to touch with any sharp objects as this will cause scratching and damage
- Please keep headset away from high-temperature, humidity and dust.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
