# Leading the way

in innovative performance and technical socks for running, walking, sports and foot health, the 1000 Mile range boasts over sixty styles and has been building its solid reputation and brand recognition since 1990.

1000 Mile is best known for its double layer, anti-blister system. The 'sock within a sock' design was introduced to the UK with the very first Original 1000 Mile Sock. The inner layer stays with the foot as the outer layer moves with the shoe, eliminating friction on the skin and protecting your feet from blisters – designed with the purpose of protecting not just athletes but also people with serious health issues like diabetes where foot health is essential.

1000  
MILE  
**30**  
YEARS  
1990 – 2020

## 30 years of 1000 Mile Sportswear – the road to success:

  
www.1000mile.co.uk

**2020** 1000 Mile Sportswear bought by Bollin Group. Distribution by Burton McCall signals an exciting new era for the brand.

**2018** *Twin Pack* single-layer socks introduced, bringing mass-market appeal and the perfect socks for casual or beginner runners and walkers.

**2008** 1000 Mile exhibits at ISPO Winter show in Munich – the 1000 Mile sock goes international.

**2007** In a world first, lovers of thick socks could now have double layer protection with the launch of *Fusion* socks by 1000 Mile.

**1998** Ladies size/fit and colours introduced. Launched with the *Lightweight Walking Sock* at COLA.

**1996** 1000 Mile Sportswear bought by Jack Galaun. *Ultimate* series socks with Tactel® inner layer introduced.

**1990** The *Original 1000 Mile* double layer sock developed by David Upton. Offered to the NHS to treat blisters, taken up by his running-obsessed children.

We have been working hard at 1000 Mile, improving our overall **sustainability** profile. This includes both the materials in our products and packaging: using more recycled, more ecological or just less materials, and shipping it as little as we can – as well as minimising the conversion process and energy inputs to arrive at finished product. While we recognise our whole industry is only at the beginning of the path, we want to continue to hit milestone markers in our brands’ evolution throughout 2022 and beyond. The 1000 Mile Recycled Range, launched in 2021, is being expanded in 2022: introducing one of our best-selling sock designs for each category of user and sock style (double and single layer, for runners, for walkers, shoe and boot socks).

# TECHNICAL INNOVATIONS

Trusted and worn all over the world, many of our socks offer a **BLISTER-FREE GUARANTEE** using a 'sock within a sock' design:

## THE GUARANTEE

DOUBLE LAYER CONSTRUCTION eliminates friction between shoe and sock, thus reducing friction between sock and foot. The skin should therefore not be rubbed by the sock, meaning no wearout for 1000 miles of use and no blisters.

*Money back or replacement if, within one year from date of purchase, either you experience blisters or the socks wear out within 1000 miles, provided care instructions have been followed and socks are returned with original receipt. Limited to one pair per purchase. [ Please note: the guarantee does NOT apply to single layer socks from 1000 Mile]*

**BLISTER-FREE GUARANTEE**

**DOUBLE LAYER**

**HEEL POWER**

**HEEL POWER** fabric technology grips the heel firmly in place, so no slippage! This is now a feature on the Ultimate Tactel® Sock, Anklet and Trainer Liner; Race Sock, Lightweight Walk Sock, Approach Sock and many others.

**FUSION SYSTEM:** The 1000 Mile Fusion sock is the first sock to offer padded zones on the heel and toe for protection together with the double layer system for reduced friction. The fusion system can be found in our Fusion and Fusion Anklet sports socks, the Fusion Walk Sock and the Fusion Services Sock.

**PADDED ACHILLES HEEL:** We have added a padded area to the heel of our Fusion range for additional support and to help protect the achilles. The warmth provided by the padding keeps the tendon supple, increasing the blood flow, reducing swelling and aiding recovery.

**TOP VENTING:** To help keep the foot cool we have developed 'top venting' with air flow channels on many of our styles.

**FLAT TOE SEAM:** We use a Lin Toe® system to provide a completely flat toe seam on our All Terrain and 2, 3 & 4 Season socks. The Lin Toe® seam is a linking system on the outside of the sock instead of the traditional sewn closure.

## SIZE AND FITTING

Almost all socks in the 1000 Mile range come in both men's and ladies' fittings, as indicated by the colour coded stitching around the toe seam:

LS (3-5½) BLUE	LM (6-8½) LILAC	M (6-8½) GREEN	L (9-11½) RED	XL (12-14) ROYAL
LADIES' FIT AAA - B		MEN'S FIT D - 4E		

## MATERIALS

**Tactel** Soft. Light. Surprisingly strong. A dynamic speciality fibre, **TACTEL** creates fabric that is soft, supple, smooth, breathable and lightweight. According to rigid testing, Tactel® fibre is at least twice as soft and 20% lighter than most other fibres. It also dries eight times faster than cotton. In addition to being soft and lightweight, Tactel® fibre is strong. The inherent strength of Tactel® fibre enables the production of fabrics that are three times as strong as those made with natural fibres. Most of the 1000 Mile double layer socks have a 100% Tactel® inner lining which helps to reduce friction on the skin but also helps keep feet cool and dry during activities.

**NILIT® HEAT** **NILIT® HEAT** captures body heat naturally for exceptional warming, with excellent absorption and moisture control for dry comfort. **NILIT® HEAT** yarn, made with coffee charcoal, warms the wearer by trapping body temperature for maximum comfort and performance. It also has natural anti-bacterial properties.

**MERINO WOOL** is one of softest types of wool available and is perfect for regulating body temperature. The wool provides warmth without overheating the wearer and its moisture wicking properties combined with being slightly moisture repellent allow the wearer to remain dry. Merino yarns can be found in up to eight different styles from our range.

**COOLMAX** fabrics are engineered to produce high-performance socks that are soft, breathable, and moisture wicking: drawing moisture away from the skin and spreading it out across the fabric to enhance evaporation and fast drying. Fresh air moves in to keep your feet cool. You will find Coolmax® in our 2 Season walk sock.

Tactel® fibre is a registered trademark of Invista and is used under license to Nilit® for nylon fibre products. Lycra® is a registered trademark of DuPont. COOLMAX® is a trademark of Invista

## THE 1000 MILE RECYCLED RANGE

Key to the range are high percentages of REPVE® recycled materials in the fabric blend: REPVE® poly yarns and high quality REPVE® recycled Nylon 6.

### REPVE® POLY FIBRE & YARN

Made from 100% recycled materials, primarily plastic bottles, creating a reprieve for the planet by reducing energy, water and greenhouse gases.

REPVE® is one of the most certified, earth-friendly fibres available in the world, currently approaching 25 billion plastic bottles re-purposed.

### REPVE® NYLON 6

For every 1lb of REPVE® Nylon, 77,000 BTU's\* are conserved, equivalent to 0.6 gallons of petrol. (\*British Thermal Units)

Reformulated from pre-consumer fibre waste, REPVE® recycled Nylon 6 opens up a world of possibilities in the use of eco-friendly, high quality nylon materials.

REPVE® fabrics are certified by SCS Global Services (SCS) for recycled content claims.

REPVE® is a trademark of Unifi, Inc.

# REPVE®

Protection and support for your feet – and the planet.

# Lite Anklet

## 2011

**DOUBLE  
LAYER**

**SS22**  
estimate  
March

This is the successor to the Ultimate Anklet, the 1000 MILE LITE ANKLET combines everything we have learned in 30 years making double-layer running socks, with the latest recycled materials from REPVEVE®. The unique combination of fibres means the inner layer helps wick moisture from the skin and keep the foot dry, while the venting and breathable knit pattern on the outer layer helps maintain a comfortable temperature. The arch brace offers additional support. Covered by our unique Blister Free Guarantee, the double layer construction helps eliminate friction between the foot and shoe, reducing wear and helping to prevent blisters.

The single layer 1000 MILE RUN ANKLET keeps feet protected and supported during running and other intense sporting activities such as racket sports and gymwork.

An abundance of REPVEVE® recycled materials in the fabric blend offers an eco-friendly alternative: REPVEVE® poly yarns are made from 100% recycled materials (primarily plastic bottles). Combined with high quality REPVEVE® recycled Nylon 6, these socks will help protect and support the planet – as well as your feet! Padded zones give added comfort and shock absorption for the heel, toes and ball of the foot: the padded heel extends to protect the achilles tendon. Ventilation mesh for superior breathability, arch bracing for extra firm grip and a fitted heel: all these features make this the cool choice, whatever your sport.

Card and plastic tag are 100% recycled, please recycle all this packaging again

# Approach Sock

1999 

**DOUBLE  
LAYER**

**SS22**  
estimate  
April

The crew length 1000 MILE APPROACH SOCK is designed for maximum comfort with today's technical approach footwear. The inner layer stays with the foot, wicking away moisture, whilst the outer moves with the shoe, reducing friction and helping to prevent blisters and reduce wear.

The unique combination of fibres maintains a comfortable temperature for the foot, making this the perfect warmer weather outdoor activity sock to wear with lightweight boots as well as approach/trail shoes and sandals.

# Activ Socklet 1466

**SINGLE  
LAYER**

The perfect sock for those with an active lifestyle. Knitted to a trainer liner length profile for those who prefer a 'no sock' look, the 1000 MILE ACTIV SOCKLET is designed to provide support and promote comfort during even the most demanding sports activities. Specially shaped to ensure the best fit whilst the arch bracing and Y heel give firm grip and no-slip stability. The super soft yarns and flat toe seam reduce irritation on the skin whilst the padded heel, toe and achilles tab offer cushioned protection. Top ventilation panels allow the foot to breathe and maintain an even temperature.

## TRAIL AND FELL RUNNING SOCK

# Trail Sock 2265

**SINGLE  
LAYER**

**TWIN  
PACK**

Perfect for trail and fell running and mountain biking, the 1000 MILE TRAIL SOCK is anatomically designed to give comfort and support during your off-road running and racing. The padded heel extends to protect the achilles tendon, toes and ball of the foot. Specially selected merino wool blend helps reduce friction, wick moisture and dry quickly, and has natural anti-bacterial qualities. Arch bracing provides a customised fit with no slippage. Ventilation zones allow the foot to breathe and maintain an even temperature.

# Run Socklet 2263

The single layer 1000 MILE RUN SOCKLET gives protection and support when and where it counts, during running and other intense sporting activities.

Knitted to a trainer liner length profile for those who prefer a 'no sock' look. Padded zones offer added comfort and shock absorption for the heel, toes and ball of the foot: the padded heel extends to protect the achilles tendon.

The specially selected fabric blend helps reduce friction, wick moisture and dry quickly. Ventilation mesh for superior breathability, arch bracing for extra firm grip and a fitted heel for exact fit: all these features make this the cool choice, whatever your sport.

# Lightweight Cricket Sock

2005

**DOUBLE  
LAYER**

The 1000 MILE LIGHTWEIGHT CRICKET SOCK is designed with maximum comfort in mind, no matter how hard the going gets. The 100% Tactel® inner layer stays with the foot, wicking away moisture, whilst the soft wool-mix outer moves with the shoe. The lack of friction between the layers helps to prevent blisters and reduces wear. The unique combination of fibres maintains a comfortable temperature for the foot. The double-layer construction means that your feet stay cool, dry and blister free – guaranteed – even after an arduous day in the field, bowling or at the crease.

# Ultimate Liner Sock

**DOUBLE LAYER**

1147 

Use as a blister-preventing base layer under a traditional thick walking sock for 4 season use or as a stand-alone summer sock with lightweight fabric boots. The 1000 MILE ULTIMATE LINER SOCK is a double layer sock: the unique Tactel® inner layer wicks away perspiration to the moisture absorbing outer layer, keeping the feet dry. The combination of fibres and top venting maintains a comfortable temperature for the foot. Arch bracing offers additional support. HeelPower fabric technology grips the heel firmly in place, so no slippage!

# Fusion Walk Sock

## 2032

BLISTER-FREE  
GUARANTEE

**DOUBLE  
LAYER**

Conventional sock wisdom dictates that you can either have padding for protection and comfort, or two layers for reduced friction. Padded socks are thick, double layer socks are thin. The mid-calf length 1000 MILE FUSION WALK Sock breaks that mould with innovative design and material technology to provide a sock that offers everything: the 1000 Mile double layer sock's blister-free guarantee with a soft durable merino wool mix outer and wicking Tactel® inner, but with padded comfort and protection, including full-length achilles tendon padding. Offers volume and warmth which is perfect for 3/4 season walking.

# 2 Season Walk Sock

## 2220

**SINGLE  
LAYER**

The 1000 MILE 2 SEASON WALK SOCK has been specifically designed for use in warm conditions. The light COOLMAX® fabric wicks away moisture and enhances air flow to keep the feet cool, and the mid-foot venting on the upper allows the foot to breathe. The padded heel extends to cover the achilles tendon with additional padded zones to cushion the ankle bones and toe box. A flat toe seam minimises rubbing and arch bracing helps to provide a customised fit.

# 4 Season Walk Sock

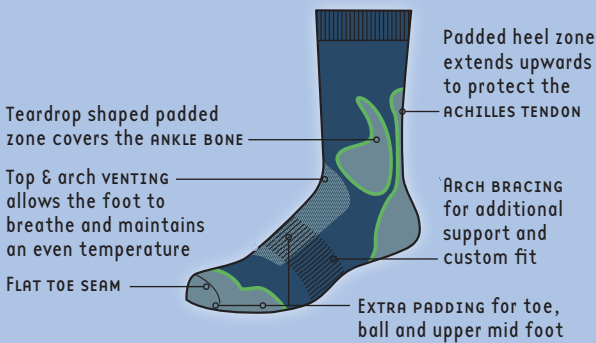

## 2240

**SINGLE  
LAYER**

The 1000 MILE 4 SEASON WALK SOCK has a thick looped-stitched pile of soft merino wool to give you high volume and warm feet in even the coldest weather conditions. Carefully chosen padded zones offer complete protection and comfort. The padded heel extends to cover the achilles tendon while other padded zones cushion the ankle bones, toes and ball of the foot. A flat toe seam reduces friction and the arch bracing helps to provide a customised fit.

Merino wool is one of the softest types of wool available and is perfect for regulating body temperature. The wool provides warmth without overheating the wearer and its moisture wicking properties, combined with being slightly moisture repellent, allow the wearer to remain dry.

All the product photography featured in this catalogue, together with lifestyle images, logos and diagrams, can be found in Dropbox – ask your sales manager for details. Point of sale materials are also available.

Hopefully, we will be seeing you at trade shows in 2022!

## 2263 Run Socklet

# 1000 MILE<sup>®</sup>

At 1000 Mile we continually strive to utilise the latest sock technology and materials. We have made more new socks for 2022 than ever before. If you have any feedback please contact us via the website.
