GENERAL DESCRIPTION

Rosslare's DigiTool[®] GC-03 charger is designed with a focus on high quality and reliability as a top priority.

It is the perfect solution for keeping the GC-01 Readers fully charged between data transfer downloads.

The GC-03 can be placed in remote strategic locations for use while a guard is away from the main base. Keeping the rechargeable battery in the GC-01 Reader properly charged enables the GC-01 to perform a maximum of 8000 read events before it must be placed in the GC-02 Base for data download.
