The Best Choice in Home Security

Hills Reliance
R128 Security System

Hills. Reliance

The Hills Reliance security system has been design using the most advanced technology available. It safeguards your home and family. Hills Reliance offers extraordinary power coupled with simplicity of use. Ideal for all residential applications, and is expandable to meet the demands of growing families.

Hills Reliance – Keeping your family safe and protected.

Advanced Technology Offers the Best Protection for Your Family

Your family and home are valuable. Statistics* show across Australia, a home is burgled just about every minute! Make sure you have adequate protection for your needs.

We have a full range of sophisticated security sensors to detect unauthorised entry into specific areas of your home. These sensors communicate with the Hills Reliance Security System to give you peace of mind.

If an intrusion attempt is detected when the system is "Armed", a loud siren will sound to deter the intruder and draw attention to the situation. In the event of an emergency, a signal can be reported to a 24hr alarm monitoring centre. The monitoring centre can then respond with the appropriate service such as phoning you or sending a patrol guard to investigate.

*ABS and NSW Bureau of Crime Statistics

Best Protec

Innovative. Stylish. Easy to Operate.

Hills Reliance uses advanced technology to make your life easier. One simple key press as you are leaving will turn on (Arm) your security system. When you return home simply enter your PIN code on a security code pad to turn off (Disarm) your security system. Or upgrade with a small wireless key fob which allows you to Arm, Disarm, activate the sirens (panic alarm) and if connected, control your garage door. When your family is home at night, the Hills Reliance can be Armed in the partial mode to monitor your home's perimeter – allowing you freedom to move around inside whilst protecting you from intruders.

Each Hills Reliance code pad has three dedicated emergency buttons to allow you to alert your Alarm Monitoring Station in the event of a fire, medical or personal emergency.

TouchNav

Hills Reliance TouchNav is an intuitive graphical touch screen interface for users of the Hills Reliance security system. Offering simple fingertip control of the security system with a clear 3.5" touch screen with easy to understand graphics.

It can be customized for each location when it is installed. This includes custom naming of zones, areas, users and output names. Users can even leave messages for other users via the internal message centre. With the Hills Reliance TouchNav, security is just a touch away.
