SERVING MEDICAL EDUCATION WORLDWIDE

AR341/AR341-B SUPRAPUBIC CATHETERISATION MODEL

Product Leaflet

Suprapubic catheterisation is becoming an increasingly common alternative to urethral indwelling catheters, and can be undertaken by practitioners and nurses in many healthcare settings. Training away from the patient is essential to ensure that practitioners feel confident and competent to carry out the procedure.

Features

Simple to set up and use

When the bladder is successfully reached water will flow through the catheter
