AR361 RHINOPLASTY SKILLS TRAINER

Product Leaflet

AR361 RHINOPLASTY SKILLS TRAINER

Developed in conjunction with **David Willatt Consultant ENT Surgeon** at Hope Hospital, Salford. This unique model has been designed for both cosmetic and functional Rhinoplasty courses.

The nose is the most defining feature of the face and altering its size or shape can result in a dramatic improvement in appearance.

Rhinoplasty surgery is a common but complex surgical procedure designed to change the shape and/or the size of the nose (cosmetic Rhinoplasty), or to improve the nasal airway (functional Rhinoplasty). Often Rhinoplasty surgery encompasses both of these elements.

Features

Life size head - weighted to provide stability during practice

Simple to replace nasal insert

The thermolabile cartilage can be shaped with a hot air blower to simulate a number of nasal deformities upon which surgery can be simulated

The material used in the nasal insert as the cartilage can be cut to form spreader grafts of appropriate length and width

Scan the QR code to access the product video
