OUR PRODUCTS:

ANATOMY MODELS

When using anatomical models to instruct aspiring medical professionals, you do not want to settle for anything less than the best. Look no further than our Anatomy Models for sale. Our models are perfect for use in a variety of courses including Human Anatomy and Physiology. You need realistic replicas when teaching medical students about Human Anatomy and human cells.

MEDICAL SIMULATORS

Medical simulation is related to education and teaching in medical fields. It involves simulated human patients, casualty simulation, emergency life support and veterinary patients. The main purpose of these trainers is to educate and train medical professionals and students to decrease accidents during general practice, prescription and surgery.

HEALTH EDUCATION

Health education products are vital to boost learning experiences, that are designed to assist people and communities to enhance their health, by increasing their knowledge, improving their skills, or influencing their attitudes. These products are serving to people and groups of individuals to find out the way to behave in an exceedingly manner of maintaining, promoting, or restoring health.

BIOLOGY & SCIENCE

Biology is the study of living organisms, divided into many specialized fields that cover their morphology, physiology, anatomy, behavior, origin, and distribution. It includes plants, animals and the human body.

GTSimulators provides products from reliable manufactures to cover the areas of Anthropology, Bio-chemistry, Botany, Cellular Biology, Dissection, Genetics, Reproduction, Development, Science and Zoology.
