

Convenient and easy to attach to a desk or table edge are features of the ETXY-0P STANDARD support that can be used with any ETXY surgical unit of Pro Delphus simulators

The ETXY-0P multipurpose base is designed to couple the surgical units of the ETXY Histero, Procto and Uro Simulator System. It's made in acrylic and stainless steel, to assemble the replaceable surgical unit, which is made of Neoderma. The ETXY Standard base model is robust and provides a versatile and functional option with the ease of coupling at a table edge or desk, taking up less space than the anatomical support.
