## X-RAY POSITIONING + CT & MR IMAGING

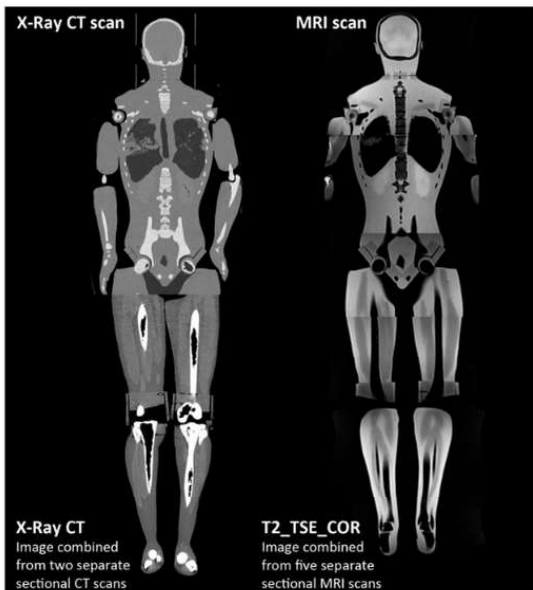

FB-A02 is a multipurpose phantom that can be used to:

- Teach X-RAY positioning techniques,
- Learn CT & MR imaging procedures,
- Find Optimal scanning conditions,
- Test and Conduct R&D for diagnostic imaging applications.

FB-A02 comes with realistic muscles in arms and legs of the phantom. This feature makes it truly realistic in terms of mimicking human anatomy.

## WHY FB-A02?

- Multipurpose use & applications
- Realistic CT & MR images
- Lifelike anatomy & weight
- Can be customized with pathologies
- High durability with joints
- Flexible joints to train on X-RAY Positioning
- Improved anatomical structures
- Realistic air cavities inside the skull
- Includes realistic brain with Grey & white matter
- Closest alternative to human bones
- Ceramic reinforced patented bone material
- Durable & stable in time
- Service warranty of 2 Years by default
- Instant customer support by manufacturer
- Quick delivery times
