

LAP-X Box is a box trainer ideal for training and maintaining certain skills, as well as for warming up before an actual medical intervention. **LAP-X Box** has an ergonomic design and an easy, intuitive, and user-friendly interface.

LAP-X Box works as a traditional box trainer with a recording software package, including a database to register different users. Users' performances can be recorded to be assessed by the instructor later. **LAP-X Box** is compatible with all kinds of different box exercises available in the market.

Benefits

- Portable, compact, and easy to set up
- Ideal for developing and improving laparoscopic skills
- Intuitive and self-explanatory system
- Administration tool to monitor the training progress of trainees
- Real surgical instruments are used, narrowing the gap between training and actual surgery
- Box trainer with endless possibilities of exercises
- Unlimited user registration
- Database to register different users
- Trainees' performance can be recorded for later assessment
- Possibility to use animal organs for training
