Handling and Safety Precautions

These precautions should be strictly observed in order to ensure safe, long-term use of the product.

The following precautions should be observed particularly strictly:

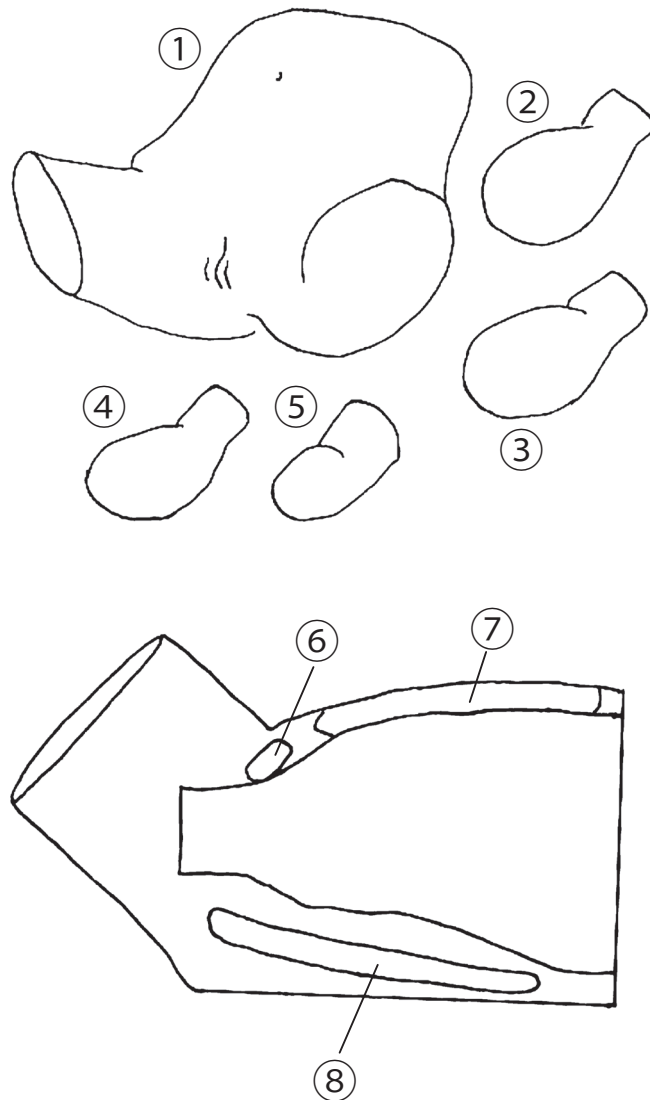

1. Since this model is made to give the same sensation to a living body, unreasonable handling may lead to breakage of the model.
2. Pinching or beating the abdomen may lead to breakage of the model.
3. Use a diluted neutral detergent to remove dirt on the model; if this is not sufficient, use a gauze soaked with ethanol for disinfection to wipe off.
※ Use of solvents such as a thinner or benzene is prohibited.
4. Do not place anything on the abdomen; the model is deformed.
5. If the epidermis or uterus recession models are felt oily, apply the attached baby powder.

1. The contents of this instruction manual are subject to change without notice.
2. This instruction manual may not be reproduced in part or in its entirety without permission.
3. Please contact the manufacturer in the event that any errors or omissions are found in the contents of this instruction manual.
4. This product should be used only as described in this instruction manual. In particular, the product should not be used in any way that contravenes the precautions noted in the instruction manual.

Table of Contents

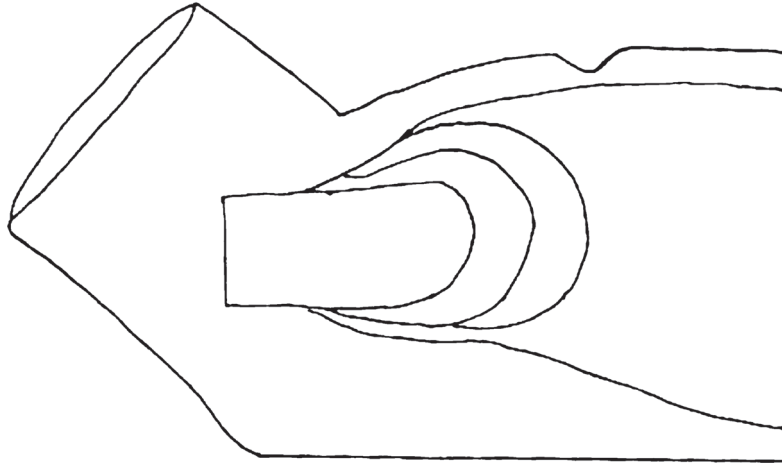

1. Name of each part
2. Instructions for handling
3. Storage method
4. specifications
5. Accessories

1. Name of each part

- ② Uterine Involution (Normal Day 1)
- ③ Uterine Involution (Subinvolution)
- ④ Uterine Involution (Normal, Day 3)
- ⑤ Uterine Involution (Normal, Day 5)
- ⑥ Pubis
- ⑦ Abdominal wall
- ⑧ Spine

2. Instructions for handling

Method for setting a uterus recession model

1. Apply enough powder to the abdominal cavity of the uterus recession model.
2. Set the model in the position shown in the figure.
 - ※ Make sure that the model is not dislocated as the direction is fixed.

3. Storage method

1. Store the main body with the attached cover in a place avoiding direct rays of the sun or ultraviolet rays.
2. Place the attached sponge for prevention of deformation in the abdominal cavity of the main body.
3. Put the uterus recession models in the attached bag.
4. When the attached bag get wet (with rain), the contents may be stained with dyes oozing out from the lining.
