

Calming Botanical Gel Mask - Organik™

Indications:

- To work on irritated skin.
- To calm redness following post-operative procedures, heat / humidity issues, or normal skin sensitivities.
- To moisturize dry, mature skin.

Key Features:

- Organic components (70%).
- Cucumber extract offers a calming feel on the skin.
- Naturally fresh and clean scent.
- May be used on all skin types.
- Spirulina is a natural algae that can nourish the skin.
- Incredibly rich protein along with antioxidants, Vitamins B1 (thiamine), B2 (Riboflavin) and B3 (Niacin), Copper, Iron, Magnesium, Potassium and Manganese.
- Can be used as an all-over face, body or spot treatment.

Directions:

- Cleanse skin with either our Antiseption Antimicrobial Cleansing Gel or Non-Drying Cleansing Lotion.
- Apply a thin amount of Calming Botanical Gel Mask to affected area(s) and let dry.
- During home and professional treatments it may be removed after twenty minutes with tepid water. Then gently pat dry and apply our E2 Serum, if needed.
- May be left on the skin overnight, if desired.
- Use as needed as often as necessary.

Warnings:

- For external use only.
- Keep away from eyes.
- Keep away from children.
- Not to be ingested.
- If irritation develops, discontinue use.

Skin Type	Sensitive	Dry/ Mature	Normal	Combo	Oily	Acne
	X	X	X	X	X	X
Face	Apply lightly and evenly on all affected areas. Usage based on area size and number of times used. The 2.5 oz jar would have approximately 8 – 10 uses for a full adult-sized face					

Ingredients:

Water, deionized, Cucumis Sativus Extract (Cucumber), Spirulina Maxima Extract, Aloe Barbadensis Leaf Juice (Organic Aloe), Tocopherol Acetate (Vitamin E), Centella Taraxacum Officinale Extract Asiatica Extract (Organic Gotu Kala), Equisetum Arvense Extract (Horsetail), Geranium Maculatum Extract (Wild Geranium), Taraxacum Officinale Extract (Organic Dandelion), Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Sodium Hydroxide, Phenoxyethanol, Ethylhexylglycerin.

Alphabetical with definition:

- Acrylates/C10-30 Alkyl Acrylate Crosspolymer is a synthetic polymer that functions as an emulsion stabilizer and to create viscosity. It is an increasing agent and typically found in moisturizing preparations. More commonly known as Carbopol.
- Aloe Barbadensis Leaf Juice (Organic Aloe); the juice expressed from the leaves of the aloe plant. Chemical class is Biological Products. Its function is a Skin-Conditioning Agent – Miscellaneous. It is reported in over 50 product categories.
- Centella Asiatica Extract (Organic Gotu Kala) is an extract of the leaves and roots of the hydrocotyl, Centella Asiatica.
- Cucumis Sativus Fruit Extract (Cucumber): The crushed fruit of the cucumber. It is a biological product that functions as a Skin Conditioning Agent – Emollient; and Skin Conditioning Agent – Miscellaneous. It is found in over 25 product categories.
- Dandelion (Organic): see Taraxacum Officinale Extract
- Equisetum Arvense Extract (Horsetail): is an extract of the whole herb of Equisetum arvense. It is in the Biological Products Chemical Class. It functions as a Skin-Conditioning Agent – Miscellaneous. It is found in products covering 17 categories.
- Ethylhexylglycerin: is an organic compound in the Chemical Class of Alcohols; Ethers. It functions as a Deodorant Agent; and Skin Conditioning Agent – Miscellaneous.
- Geranium Maculatum Extract (Wild Geranium) is made directly from the plant's flower. Chemical Class is a Biological Product. Function is not reported in the CTFA directory. It is typically found in Foundations and Permanent Hair Treatments. Although it's history claims use to include calming and anti-inflammatory, we are maintaining its use the natural scent
- Gotu Kala (Organic): see Centella Asiatica Extract:
- Horsetail: see Equisetum Arvense Extract
- Phenoxyethanol: is an aromatic ether alcohol. It is in the Chemical Classes of Alcohols and Ethers. It serves 2 basic functions: Fragrance ingredient and Preservative. It is used in over 50 Product Categories.
- Sodium Hydroxide: In the Chemical Class of inorganics that functions as a Denaturant; pH adjuster. It is utilized in 40 different Product Categories from Baby Products to Tanning Preparations.
- Spirulina Maxima Extract is reduced to a fine powder from natural algae (cyanobacteria) that is incredibly high in protein. It is a good source of antioxidants, vitamins and other nutrients. Spirulina is a superb source of antioxidants, which protect against oxidative damage. The main active component is called phycocyanin. This substance gives Spirulina its unique blue-green color. Phycocyanin can fight free radicals and inhibit production of inflammatory signaling molecules, providing impressive antioxidant and anti-inflammatory effects - Joe Leech, MS
- Taraxacum Officinale Extract: is from the extract of the rhizomes and roots of the dandelion. It is in the Chemical Class of Biological Products. It's function is a Skin Conditioning Agent – Miscellaneous.
- Tocopherol Acetate (Vitamin E): Obtained by the vacuum distillation of edible vegetable oils. Used as a dietary supplement and as an antioxidant for essential oils, rendered animal fats or a combination of such fats with vegetable oils. Helps form normal red blood cells, muscle and other tissues. Protects fat in the body's tissues from abnormal breakdown. Experimental evidence indicates Vitamin E may protect the heart and blood vessels as well as retards aging. Creates synergistic qualities in other ingredients in the pharmaceutical-grade form (99.9% pure).
- Water, Deionized: Synonymous with demineralized water / DMwater. This is water that has had almost all of its mineral ions removed, such as cations like sodium, calcium, iron, and copper, anions such as chloride and sulfate.
- Wild Geranium: see Geranium Maculatum Extract
