

### **Professional Scalp Activator - Step 3**

#### **Indications:**

- To improve scalp and hair health.
- To improve blood flow to the scalp.
- To eliminate residue left by new hair growth.

#### **Key Features:**

- For all stages of thinning hair.
- Markedly improves blood flow to the scalp.
- Makes the scalp and hair follicles healthier.
- Improves elimination of debris created by new hair growth and sebum production.
- Can be used twice daily to maximize benefits.
- Enhances absorption and oxygenation into the scalp, which helps hair growth.

#### **Directions:**

- Apply 15 drops of Scalp Activator to thinning areas. Allow to dry.
- Within 3 – 5 minutes, you should feel a strong tingling sensation.
- The scalp may begin to turn bright pink as blood rushes to the surface layers of the dermis. This is normal.
- For best results apply Scalp Defense as soon as you notice increased pink color.
- You may also use this product at night before bed.
- This product will not cause hair growth in other areas such as the face or back should the product drip or run.

#### **Warnings:**

- Keep away from small children.
- Avoid contact with eyes. In case of accidental exposure flush with cool water or (on skin) apply a cold compress until pinkness goes away.
- For external use only.
- In case of accidental ingestion, induce vomiting and contact a poison control center or physician.

**Ingredients:**

Purified Water, Isopropyl Alcohol, Methyl Nicotinate.

Isopropyl alcohol dissolves a wide range of compounds. It evaporates quickly and is relatively non-toxic compared to alternative solvents. It helps to dissolve lipophilic contaminants such as sebum, oil and waxes found in most hair care products. It is also used as a vehicle to deliver the methyl nicotinate quickly into the scalp.

Methyl Nicotinate is an external analgesic.
