NEW YORK'S

Model 8027SX

Breakthrough innovation in rollers

Nemco offers the unique GripsIt™ roller that combines a subtle friction characteristic with a smooth surface finish. It effectively turns your taquitos and other specialty items—and still cleans up with ease!

innovations.

Model 8045SXW-SLT

Model 8050SX-RC

Relentless ROI

Plug it in, turn it on, load it up and make money. The instructions that come with a Nemco roller grill are really that simple.

If you like service calls, maintenance schedules and breakdowns, look for another line of equipment.

American Made, Operator Inspired

Your Nemco grill is manufactured in Ohio. Better yet, its product development happens all across the U.S., in partnership with some of the largest chains, to make sure we put our equipment through the applications and performance testing that reflects the needs of operators like you.

Ridiculously Easy to Use

Every successful business owner knows how to delegate. In the hot-dog sales area, leave it to your Nemco grill. With programming, food presentation, merchandising and other innovations, these machines are virtually self-sufficient.

Get 'em started, and walk away.

Model 8027-SLT

Model 8250SX-SLT (shown with food dividers)

Merchandising punch

Nemco designs to sell, offering custom graphics and special features, such as stair-stepped roller configurations that give your customers a better view of what's cookin'.

"Set-it-and-forget-it" convenience

The Nemco line offers grills with digital readouts and controls, including preprogrammed operation that automatically cycles through preheat, cook and hold. Just push a button, walk away and let the money roll in.

everything you need to keep your dogs
fresh, fast, flavorful

Everyone has his or her own way of enjoying the all-American hot dog, and when it comes to maximizing profitability, operators are no different.

That's why Nemco is forever exploring new concepts, expanding our line of staple accessory items and working with operators to develop custom solutions.

Round out your complete hot dog station

Digital Roller Grills

First things first. At the center of every successful self-serve application is a hard-working grill.

Nemco's digital models don't just work harder. They work smarter—with preprogrammed controls and "see it from across the room" temperature readouts that make operation as easy as possible.

All your employees have to do is load up the food, hit a button and walk away. The grill's preheat, cook and hold temperatures cycle through automatically, ensuring perfectly cooked product with virtually zero supervision.

So, your customers get their appetites satisfied, while your people get more work done!

Bun Warmers & Bun Boxes

Every leader like the Nemco Roller Grill needs a reliable counterpart, and you're sure to find one in Nemco's equally diverse lineup of durable bun warmers and bun boxes.

You can choose from a wide range of capacities, many with moist-heat options, and all made of commercial-tough stainless-steel construction that stands up under the pressure of fast-paced concessions and other retail environments.
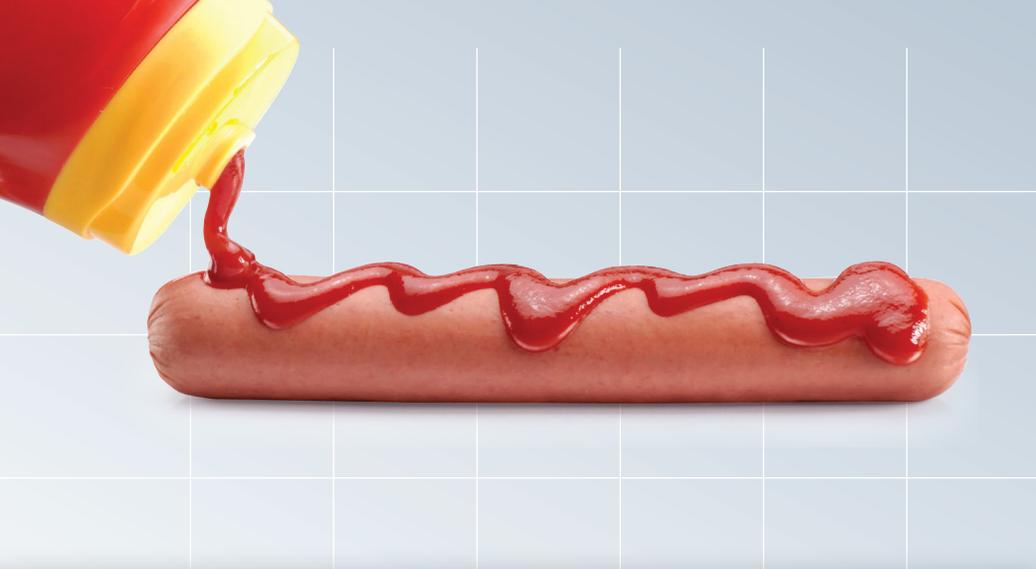

They're all likewise designed to be stackable for optimum space savings, with varying sizes that fit perfectly under their companion roller grills for the ultimate in user convenience.

hot dog BUNS

Count on Nemco to have everything you need to round out a complete hot-dog equipment station.

Grill shown with control cover

Divider Kits

- Perfect with digital roller grills to minimize the need for operator supervision
- Keep food nicely aligned on the rollers
- Ideal for optimum food presentation
- Easily width-adjustable, yet securely fixed in place
- Available for regular and slanted roller grills

Self-Serve Guards

Nemco's trademark durability characteristics translate into self-serve guards made of polycarbonate material that is much more heat and impact resistant than that of standard guards.

With a wide range of sizes to fit Nemco's broad line of roller grills, these guards are designed to fit firmly in place, but are still easy to remove for grill loading and cleaning.

For added convenience, all polycarbonate guards feature a flat top that can double as a handy, temporary shelf, while Nemco's special 'canopy' models are the perfect solution for pass-through applications.

Tongs with Holder

- A virtual necessity for self-serve applications—keeps tongs handy, alongside the grill
- Super-elastic cord prevents tongs from going anywhere and getting misplaced, but allows plenty of slack for easy use
- Fits any grill model

Model 8036GD

*Model 8250-CGD*

Model 88100-CB-2

Condiment Bars & Stations

- Multiple wells offer your customers more options
- Stainless-steel construction helps keep ice pack cold
- Pump dispensers are easy to operate
- Cleanup is a cinch

anatomy of a
workhorse

• Smart features, such as aluminum and stainless-steel construction and a removable drip pan make routine cleanup easy—which, in turn, also promotes performance longevity.

• Individual heating elements in each roller evenly distribute wattage for uniform cooking performance across the entire roller surface.

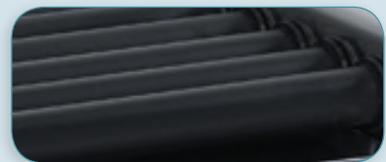

• A synthetic bearing and a grease barrier double-protect components from grease.

synthetic bearing   grease barrier

• 360° roller rotation prevents residue buildup.

• Motor design has been engineering-specified for marathon commercial-grade endurance. It includes stainless-steel bearings and a cast-aluminum housing that is sealed against heat, oils and common food debris—all culprits that often cause other grill motors to seize up. Larger Nemco grills—starting with models 8036 and up—feature two of these motors.

• Nemco's proprietary GripsIt™ roller coating effectively "grips" food items that slip and fail to rotate on chrome. Yet, like chrome, GripsIt is easy to clean.

Competitors' textured roller surfaces are problematic—because, in the process of cleaning, they often relentlessly grab and hold towel fibers that can leave your grill surface looking unsightly to customers and alarming to inspectors.
