General Information

Omcan Manufacturing and Distributing Company Inc., Food Machinery of America, Inc. dba Omcan and Omcan Inc. are not responsible for any harm or injury caused due to any person's improper or negligent use of this equipment. The product shall only be operated by someone over the age of 18, of sound mind, and not under the influence of any drugs or alcohol, who has been trained in the correct operation of this machine, and is wearing authorized, proper safety clothing. Any modification to the machine voids any warranty, and may cause harm to individuals using the machine or in the vicinity of the machine while in operation.

CHECK PACKAGE UPON ARRIVAL

Upon receipt of an Omcan shipment please inspect for external damage. If no damage is evident on the external packaging, open carton to ensure all ordered items are within the box, and there is no concealed damage to the machine. If the package has suffered rough handling, bumps or damage (visible or concealed), please note it on the bill of lading before accepting the delivery and contact Omcan within 24 hours, so we may initiate a claim with the carrier. A detailed report on the extent of the damage caused to the machine must be filled out within three days, from the delivery date shown in the shipping documents. Omcan has no recourse for damaged products that were shipped collect or third party.

Before operating any equipment, always read and familiarize yourself with all operation and safety instructions.

Omcan would like to thank you for purchasing this machine. It's of the utmost importance to save these instructions for future reference. Also save the original box and packaging for shipping the equipment if servicing or returning of the machine is required.

Omcan Fabrication et distribution Companie Limité et Food Machinery d'Amerique, dba Omcan et Omcan Inc. ne sont pas responsables de tout dommage ou blessure causé du fait que toute personne ait utilisé cet équipement de façon irrégulière. Le produit ne doit être exploité que par quelqu'un de plus de 18 ans, saine d'esprit, et pas sous l'influence d'une drogue ou d'alcool, qui a été formé pour utiliser cette machine correctement, et est vêtu de vêtements de sécurité approprié. Toute modification de la machine annule toute garantie, et peut causer un préjudice à des personnes utilisant la machine ou des personnes à proximité de la machine pendant son fonctionnement.

VÉRIFIEZ LE COLIS DÈS RÉCEPTION

Dès réception d'une expédition d'Omcan veuillez inspecter pour dommages externes. Si aucun dommage n'est visible sur l'emballage externe, ouvrez le carton afin de s'assurer que tous les éléments commandés sont dans la boîte, et il n'y a aucun dommage dissimulé à la machine. Si le colis n'a subi aucune mauvaises manipulations, de bosses ou de dommages (visible ou cachée), notez-le sur le bond de livraison avant d'accepter la livraison et contactez Omcan dans les 24 heures qui suivent, pour que nous puissions engager une réclamation auprès du transporteur. Un rapport détaillé sur l'étendue des dommages causés à la machine doit être rempli dans un délai de trois jours, à compter de la date de livraison indiquée dans les documents d'expédition. Omcan n'a aucun droit de recours pour les produits endommagés qui ont été expédiées ou cueillies par un tiers transporteur.

General Information

Avant d'utiliser n'importe quel équipement, toujours lire et vous familiariser avec toutes les opérations et les consignes de sécurité.

Omcan voudrais vous remercier d'avoir choisi cette machine. Il est primordial de conserver ces instructions pour une référence ultérieure. Également conservez la boîte originale et l'emballage pour l'expédition de l'équipement si l'entretien ou le retour de la machine est nécessaire.

Omcan Empresa De Fabricacion Y Distribucion Inc. Y Maquinaria De Alimentos De America, Inc. dba Omcan y Omcan Inc. no son responsables de ningun daño o perjuicio causado por cualquier persona inadecuada o el uso descuidado de este equipo. El producto solo podra ser operado por una persona mayor de 18 años, en su sano juicio y no bajo alguna influencia de droga o alcohol, y que este ha sido entrenado en el correcto funcionamiento de esta máquina, y ésta usando ropa apropiada y autorizada. Cualquier modificación a la máquina anula la garantía y puede causar daños a las personas usando la máquina mientras esta en el funcionamiento.

REVISE EL PAQUETE A SU LLEGADA

Tras la recepcion de un envio Omcan favor inspeccionar daños externos. Si no hay daños evidentes en el empaque exterior, Habra el carton para asegurararse que todos los articulos solicitados estén dentro de la caja y no encuentre daños ocultos en la máquina. Si el paquete ha sufrido un manejo de poco cuidado, golpes o daños (visible o oculto) por favor anote en la factura antes de aceptar la entrega y contacte Omcan dentro de las 24 horas, de modo que podamos iniciar una reclamación con la compañía. Un informe detallado sobre los daños causados a la máquina debe ser llenado en el plazo de tres días, desde la fecha de entrega que se muestra en los documentos de envío. Omcan no tiene ningun recurso por productos dañados que se enviaron a recoger por terceros.

Antes de utilizar cualquier equipo, siempre leer y familiarizarse con todas las instrucciones de operación y seguridad.

Omcan quisiera darles las gracias por la compra de esta máquina. Es de la máxima importancia para guardar estas instrucciones para referencias en el futuro. También guarde la caja original y el embalaje para envío del equipo si el mantenimiento o la devolución de la máquina es necesaria.

Safety and Warranty

IMPROPER USE

1. Do not use this appliance for grinding anything other than roasted coffee beans.
2. Never operate the appliance with no coffee beans in the bean container.
3. Remove from the coffee beans any foreign bodies which may damage the grinding wheels (metal staples, stones, etc.).
4. The appliance should neither be cleaned in a jet of water nor with a high pressure spray.

Safety and Warranty

5. For electrocution risk protection reasons, never plunge the base into water or any other liquid.
6. Unplug the appliance before carrying out any work on it: cleaning, maintenance or repair.
7. The use of spare parts other than certified SANTOS original parts is prohibited.
8. Do not use the appliance if the power supply cord is damaged. It must be replaced by either a SANTOS approved dealer or a person with similar qualifications to avoid any danger.
9. Connect several appliances to the same power socket.
10. Do not use the appliance outdoors.
11. Never place the appliance close to or on a source of heat.
12. This appliance is a professional machine designed exclusively for professional use. It is not designed for household use.
13. This appliance is not designed for use by people (including children) whose physical, sensorial or mental capacities are impaired or by people with no experience or knowledge, unless they have been supervised or given training in the use of the appliance beforehand by a person responsible for their safety. Supervise children to ensure they do not play with the appliance.

ELECTRICAL CONNECTION

Line protection: The appliance should be connected to a standard 2-pole + ground electric socket. The installation should be fitted with an RCD and a fuse rated at 16A. The appliance must be grounded.

CARE

- Before connecting the machine, check that the mains electrical voltage is the same as the voltage for your appliance. Its value is shown:
 - Either on the identification plate under the machine.
 - Or in the technical specifications in this manual.
- If the power cable (10) is damaged, it should be replaced by a special assembly available from approved Omcan dealers or from Omcan.
- Check that the On / Off switch (11) is in the 0 position before connecting the power cable plug (10) to your mains electric power socket.

USING FOR THE 1ST TIME:

Carefully clean the parts in contact with the coffee (fig. A).

- Take off the lid (1), the bean container (2) and the ground coffee collector (3) and wash them with a standard dish washing product.

RECYCLING THE PRODUCT AT THE END OF ITS SERVICE LIFE

This equipment is marked with the selective sorting symbol relating to wastes from electrical and electronic equipment. It signifies that this product should be taken over by a selective collection system conforming to the Guideline 2002/96/EC (WEEE) – part Professional Equipment – so that it can be either recycled or dismantled in order to reduce any impact on the environment. For more information, please contact your Retailer or Omcan. For eliminating or recycling components of equipment, please contact a specialized company or

Safety and Warranty

contact Omcan. The electronic products not undergoing a selective sorting are potentially dangerous for the environment. The damaging materials should be eliminated or recycled according to the regulations in force.

1 YEAR PARTS AND LABOUR BENCH WARRANTY

Within the warranty period, contact Omcan Inc. at 1-800-465-0234 to schedule a drop off to either an Omcan authorized service depot in the area, or to an Omcan Service warehouse to repair the equipment.

Unauthorized maintenance will void the warranty. Warranty covers electrical and part failures, not improper use.

Please see <https://omcan.com/disclaimer> for complete info.

WARNING:

The packaging components are classified as normal solid urban waste and can therefore be disposed of without difficulty.

In any case, for suitable recycling, we suggest disposing of the products separately (differentiated waste) according to the current norms.

DO NOT DISCARD ANY PACKAGING MATERIALS IN THE ENVIRONMENT!

Technical Specifications

Model	Santos 40
Power	310 W
Output	17.6 lbs. / 8 kgs. per hour
Variable Speed	1800 RPM
Hopper Capacity	4.9 lbs. / 2.2 kgs.
Electrical	120V / 60Hz / 1Ph
Dimensions	8" x 16" x 23" / 203 x 406 x 406mm
Packaging Dimensions	18" x 10" x 26" / 457 x 254 x 660mm
Weight	30 lbs. / 13.6 kgs.
Packaging Weight	34 lbs. / 15.4 kgs.
Item Number	44638

Operation

ASSEMBLY AND PREPARATION (FIG. A)

1. Clip the ground coffee collector (3) onto the base (4).
2. Put the dose measurer lid (24) in place.
3. Put the bean container (2) in place on the grinder body adjustment nut (5).
4. Pour the roasted coffee beans into the bean container and put the lid on the bean container.
5. Open the bean container shutter (6).

USING

1. Switch the electric current on to the machine by putting the On / Off switch (11) to the 1 position (the motor will start) (fig. B).
2. The coffee beans are then ground by the grindstones and the ground coffee leaves the grinder body and goes to fill the dose measurer.
3. Place the filter-holder under the measurer outlet (23) using the filter-holder support (22) to help.
4. Pull the measurer handle (21) once or twice to deliver one or 2 measure(s) of ground coffee.
5. Remove the filter-holder and tamp down the coffee with the tamper (20) fixed to the dose measurer.

Note: A 5-figure counter on the side of the dose measurer counts each measure.

The motor stops automatically when the dose measurer is full. It starts again, after a few measures, when the ground coffee level has dropped sufficiently. Because of this, the machine can be left with the electric power on in position 1 all the time it is being used.

COFFEE GRINDING ADJUSTMENT

Note: Never leave the machine to run with the two grindstones in contact. If the grindstones make contact this may result in ground coffee getting jammed in the grinder body and premature wear of the grindstones.

The machine is factory-set so that the "0" mark on the nut graduated plate (5) relates to the finest grinding without the grindstones touching (fig. C).

1. Hold the adjustment screw (5) with one hand and press the indexing pointer (7) with the other.
2. Tighten the adjustment nut by turning in a clockwise direction (right-handed thread) one or two notches for finer grinding.
3. Loosen the adjustment nut by turning in an anti-clockwise direction (right-handed thread) one or two notches for coarser grinding.
4. Release the indexing pointer (7) to retain the grinding adjustment.
5. Draw off a few measures of coffee to check the grinding adjustment.

Depending on the type of coffee used and the fineness of grinding required, the output may drop considerably. A too fine grinding setting may heat up the coffee and alter its flavour.

Operation

ADJUSTING THE MEASURED DOSE OF GROUND COFFEE

The dose measurer should be cleaned regularly to prevent conglomerated blocks of coffee on the cross bars from affecting the dose measurer setting.

The machine is factory-set for a measure of approximately 7g.

1. Turn the machine on and allow the dose measurer to fill up.
2. Draw off 4 to 5 measures; the machine should restart.
3. Wait for the machine to stop and then draw off another 5 to 6 measures.
4. Measure the mass (weight) of the measures after that.
5. Tighten the thumb-wheel (8) by turning in a clockwise direction (right-handed thread) to reduce the quantity of ground coffee per measure (the thumb-wheel is adjusted in half-turns) (fig. D).
6. Loosen the thumb-wheel (8) by turning in an anti-clockwise direction (right-handed thread) to increase the quantity of ground coffee per measure.
7. Draw off more than 6 measures for the adjustment to be taken into account.

Maintenance

CLEANING

IMPORTANT:

- In every case, the machine should be stopped and the machine's power supply cable (10) unplugged.
- Cleaning with a water spray or pressure spray is not permitted.

Clean the dose measurer properly using a brush. Make sure that the walls of the coffee delivery conduits and the 6 branches of the cross-bars are always clean.

MAINTENANCE

Before carrying out any work on the machine, it is essential to unplug it from the mains and to discharge the motor starting capacitor.

IMPORTANT: Use of spare parts other than certified original SANTOS parts is prohibited.

DISCHARGING THE CAPACITOR

- Unscrew the 2 screws located under the machine in the middle of the base plate (fig. E).
- Pull the electrical components unit (20) out of the base plate.
- Using a screwdriver with an insulated handle, touch the 2 capacitor connections (15). The sight of an electric arc shows that the capacitor has been discharged.

Maintenance

SPARE PARTS

This machine requires no specific maintenance. The bearings are lubricated for life. If work is required to replace worn parts such as the grindstones or the electric or other components, refer to the parts list.

For all spare part orders state:

- The type.
- The machine serial number.
- The electrical specifications (16) recorded under the machine.

REPLACING THE GRINDSTONES

IMPORTANT: always change both 2 grindstones (9) at the same time.

The 2 grindstones are identical and can be fitted equally either on the moving plate (18) (moving grindstone) or on the adjusting “nut” (5) (fixed grindstone) (fig. F).

1. Close the bean shutter (6) (fig. G).
2. Run the machine until the coffee beans waiting in the grinder body have gone through.
3. Stop the machine and unplug the mains power lead (10).
4. Take off the bean container (2).
5. With one hand, press on the indexing pointer (7) and with the other unscrew the adjustment nut by turning it in an anti-clockwise direction (fig. H).

CARE: When this part is fully unscrewed, handle it with care so as not to damage the brass thread.

6. Unscrew the 3 screws on each grindstone (fig. I). For the moving grindstone, place a screwdriver across the grinder body and the coffee outlet conduit to stop the grindstone-carrier plate from turning on unscrewing or screwing up the grindstone retaining screws.
7. Carefully clean the whole grinder body, in particular the grindstone facing areas.
8. Place each grindstone on its support making sure that there is no coffee dust between the grindstone and its support.

CARE: The slightest small coffee particle under the grindstone may prevent the machine from operating correctly. It is recommended that the grinder body is cleaned with a compressed air jet or a dry brush.

CARE: do not unscrew the grindstone-carrier plate (18) retaining spindle (17) so as not to upset the assembly geometry (fig. J).

9. Once the 2 grindstones have been replaced, with one hand press the indexing pointer (7) and with the other place the “ground coffee adjustment nut” (5) on the grinder body taking care not to damage the thread. Without using force, put the “nut” (5) on the grinder body unscrewing it gently to feel for alignment of the two threads and thus to be able to feed them in without using force. Then tighten until the 2 grindstones come into contact (fig. K).
10. Unscrew the “adjustment nut” (5) to free the grindstones in contact.
11. Plug the machine in and switch it on with no coffee.
12. While pressing the indexing pointer with one hand, with the other screw up the “adjustment nut” (5) until the 2 grindstones make slight contact.
13. Stop the machine.
14. Unscrew the graduated plate (12) retaining screws and re-index the graduated plate “0” with the indexing pointer (7) (fig. L).

Maintenance

15. Unscrew the “adjustment nut” (5) by 5 to 10 notches.
16. With coffee, adjust the ground coffee setting (see “Coffee grinding adjustment” section).

Troubleshooting

Carefully determine the reason for the machine stopping.

In all circumstances, if the problem persists, disconnect the electric power supply (unplug the mains supply lead plug (10)) and call on someone from the maintenance department or contact an approved SANTOS dealer.

Where appropriate, do not forget to close the bean container shutter (6) before removing the container.

THE MACHINE WILL NOT START

- Check: the mains power supply and the condition of the power supply lead (10).
- Check that the On / Off switch indicator (11) lights up when the switch is in the 1 position. If not, replace the switch.
- Check that the grindstones (9) are not making contact preventing the motor from starting.
- Check that there are no foreign bodies stuck between the grindstones.
- Inside the machine, check the condition of the electric wiring and the connections (on the switch (11), on the component support module (20) (fig. N) (the electric components can be accessed without dismantling the machine) and on the dose measurer automatic device unit (19) (fig. M)).
- Check the electric components, replacing them one by one.

THE MACHINE STOPS AS A RESULT OF MOTOR OVER-HEATING: (THE MOTOR UNIT IS HOT)

The motor is protected by an integral thermal protection. If the motor overheats, it stops.

- Check that there are still coffee beans in the bean container (2).
- Put the On / Off switch (11) to the 0 position and unplug the machine.
- Wait for the motor to cool down (20 to 45 minutes) then press the On / Off switch (11) (position 1).

THE MACHINE STOPS AS A RESULT OF AN OVERLOAD

A foreign body between the grindstones, grindstones making contact, a too fine coffee grinding or intensive operation may result in a motor overload. Under these circumstances, either the thermal protection or the excess current protection may be activated and stop the machine operating. If the machine is hot, refer to the section “The machine stops as a result of motor over-heating”).

- Turn off the electric power supply (unplug the mains power lead (10)).
- Move the On / Off switch (11) to the 0 position.
- Under the machine (fig. O), press the button (13) to reset the excess current protection. If the button does not remain in the “reset” position, allow the machine to cool down before repeating the operation.

THE MACHINE STOPS A FEW MINUTES AFTER STARTING

- Check the electric components (start relay).

Troubleshooting

If the problem persists, turn the machine electric power off (unplug the mains power lead (10)) and call on someone from the maintenance department or contact an approved SANTOS dealer.

THE GROUND COFFEE MEASURE IS NOT EVEN

- Check that there are coffee beans in the bean container.
- Clean the coffee dose measurer.

THE GROUND COFFEE JAMS IN THE GRINDER BODY CONDUIT

- The machine has perhaps been subjected to a vertical blow (e.g.: during transport), remove the dose measurer and check that the seal between the dose measurer and the grinder body outlet conduit has not come out of its housing.

THE MACHINE RUNS FOR A LONG TIME WITHOUT FILLING THE DOSE MEASURER

- Check that there are coffee beans in the bean container.
- Check that the bean container shutter is in the open position.
- Replace the grindstones.
- Check the dose measurer seal is properly positioned.

Thank you for choosing Omcan | Merci d'avoir choisi Omcan | Gracias por elegir Omcan

Since 1951 Omcan has grown to become a leading distributor of equipment and supplies to the North American food service industry. Our success over these many years can be attributed to our commitment to strengthen and develop new and existing relationships with our valued customers and manufacturers. Today with partners in North America, Europe, Asia and South America, we continually work to improve and grow the company. We strive to offer customers exceptional value through our qualified local sales and service representatives who provide convenient access to over 5,000 globally sourced products.

Depuis 1951 Omcan a grandi pour devenir un des "leaders" de la distribution des équipements et matériel pour l'industrie des services alimentaires en Amérique du Nord. Notre succès au cours de ces nombreuses années peut être attribué à notre engagement à renforcer et à développer de nouvelles et existantes relations avec nos clients et les fabricants de valeur. Aujourd'hui avec des partenaires en Amérique du Nord, Europe, Asie et Amérique du Sud, nous travaillons continuellement à améliorer et développer l'entreprise. Nous nous efforçons d'offrir à nos clients une valeur exceptionnelle grâce à nos ventes locales qualifiées et des représentants de service qui offrent un accès facile à plus de 5000 produits provenant du monde entier.

Desde 1951 Omcan ha crecido hasta convertirse en un líder en la distribución de equipos y suministros de alimentos en América del Norte industria de servicios. Nuestro éxito en estos años se puede atribuir a nuestro compromiso de fortalecer y desarrollar nuevas relaciones existentes con nuestros valiosos clientes y fabricantes. Hoy con socios de América del Norte, Europa, Asia y América del Sur, que trabajan continuamente para mejorar y crecer la empresa. Nos esforzamos por ofrecer a nuestros clientes valor excepcional a través de nuestro local de ventas y representantes de los servicios que proporcionan un fácil acceso a más de 5,000 productos con origen a nivel mundial.
