

OVER 800,000,000 BOTTLES RECYCLED ANNUALLY

FREQUENTLY ASKED QUESTIONS

Are current cartons made from 100% recyclable material?

Absolutely, and have been since 2007.

Are they made from recycled products?

Yes, they're made from used soft drink bottles, water bottles, energy drink bottles and other bottles made from PET (polyethylene terephthalate or look for this symbol). Since they're made from these materials, we call them R-PET or Recycled PET cartons.

Can these cartons be recycled again?

Yes, and can be recycled again and again.

Are they good for the environment?

Yes! Since we re-use discarded PET bottles, we are not only reducing the amount of bottles going into landfill or waterways but reducing the production of new PET into the world.

Does this mean they have a reduced CO² footprint?

Yes, through our production method and design, we are able to have the lowest CO² emissions in comparison to other cartons.

- The use of plastics rather than traditional cardboard means that 40% less lorries are on the road delivering packaging and 40% less warehouse space required.
- No fresh water is used in the production of our egg cartons.
- In our production process, we use approximately 60% less energy than cardboard cartons (due to drying process).
- Energy consumption used in production has reduced by 35% within the last 5 years.
- By implementing new ultra-hygienic outer-packaging for products, a reduction of 57% emissions has been achieved.

Are these cartons hygienic?

Yes, these cartons are 100% food-grade material thanks to our advanced recycling and production process.

The design of the cartons also helps reduce potential contaminants by the anti-tampering locking system and water-proof exterior.

Do these cartons benefit our customers?

Absolutely! Being a see-through carton, customer's can inspect the eggs before purchase without opening the carton. Not only this, it's also ensuring customers receive:

- Food grade material.
- Environmentally friendly and consciously produced cartons.
- Fully recyclable packaging.

Do these cartons help reduce food waste?

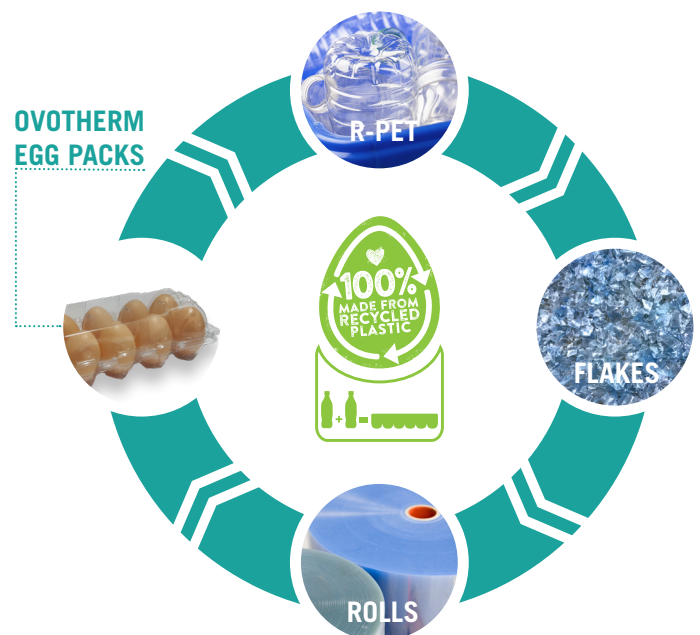

Yes. The sturdy design allows for a reduction in wastage by as much as 50%.
