PRODUCT GUIDE

OUTDOOR STOVES & ACCESSORIES

OPTIMUS COOKING SINCE 1899™

A MOMENT OF PEACE

Optimus originally comes from Sweden and has produced outdoor stoves and accessories for more than a century. Every outdoor adventure is a guaranteed success with these safe, easy-to-use camp stoves. The products are perfect for all those who not only appreciate their light weight but also their performance and their simple operation. Whether you are in the mountains, enjoying the backcountry, or on a long trek, when you are "on the road" with Optimus, there are no limits.

YOUR CHOICE OF STOVE

The biggest decision to keep in mind when choosing a stove is whether to go with gas or liquid fuel.

GAS Gas stoves are easy to use. Most people who like to cook in the outdoors choose a gas stove because of its simplicity. You don't have to fill it with fuel, it's quick to light, and easy to control. The disadvantages of gas stoves are that they are less powerful when it's cold, and that it can be difficult to find the right gas canisters. If you want maximum performance and minimum pack size, you should choose the **OPTIMUS CRUX**. Folded, you can carry it in your pocket, yet unfolded and at full power it will boil a liter of water in 3 minutes. The **OPTIMUS CRUX LITE** is similar to the Crux but doesn't fold as flat. At 72 g it is one of the world's lightest stoves! The **OPTIMUS VEGA** fills the gap between technical and sometimes challenging multifuel stoves and pressurized gas stoves where use can be limited in below-freezing temperatures. It is a high-performance 4-season camp stove with an integrated hose connector.

FUEL Multifuel stoves, as the name implies, give you the flexibility of using different fuels. If you travel abroad a lot, or live out of a backpack for long periods, you can use whatever fuel is available. And if you like being outdoors throughout the year, there's no problem with cooking under cold-weather conditions.

Our prize-winning old workhorse, the OPTIMUS NOVA, has endured every conceivable sort of hardship throughout the world. Another member of the family, the OPTIMUS NOVA+, has all the features of the Nova with the controls moved away from the burner. Don't forget to take spares when you go on longer trips. Visit us on www.optimusstoves.com to see our complete range of spares and accessories.

Enjoy nature responsibly!

OPTIMUS NOVA

- Patented quick priming burner requires less preheating and saves fuel
- Burns all types of fuel - using same burner jet
- All activation points in green color
- Precise and immediate simmer control
- Compact and durable design (turbine-shaped legs)
- Ultra compact

The legendary **OPTIMUS NOVA** is the award winning benchmark multifuel stove. The patented quick priming burner requires less preheating & saves fuel. The single jet multifuel technology burns all types of fuel using the same burner jet. Along with the self-purging aluminum pump and built-in magnetic cleaning needle, the Optimus Nova has all the features that ensure reliability and ease-of-use in all weather conditions.

Art. # 8016276

OPTIMUS NOVA+

- Remote simmering control valve
- Provides easier cooking with windscreen and larger pots
- Patented quick priming burner requires less preheating and saves fuel
- Design is compact and lightweight

The **OPTIMUS NOVA+** is a multifuel stove with the same features as the Optimus Nova – plus a little more. It has been upgraded with the Powerline™, precise remote control valve that uses the fuel hose as an extension to the valve. Control the flame from simmer to boil at a safe distance from the burner head.

Art. # 8016277

OPTIMUS HIKER+

- All activation points in green color
- Integrated fuel tank
- Automatic magnetic jet cleaning system
- One piece design with no loose parts
- Very robust construction

The **OPTIMUS HIKER+** is compact and rugged. It features the Optimus Nova burner. The steel case protects the tank and burner when packed. The patented quick priming burner requires less preheating and saves fuel. It burns all type of fuels using the same burner jet.

Art. # 8016278

OPTIMUS SVEA

- Integrated fuel tank
- Stove lid serves a small cooking pot
- Super compact design
- Ideal for single adventures and high altitude cooking

The **OPTIMUS SVEA** is an ultra-classic lightweight gasoline stove made out of solid brass - a cult stove of the climbing society. The Optimus Svea has been around for a century and is renowned for its performance at high altitudes.

Art. # 8016279

OPTIMUS VEGA

GAS

ALPIN
Allround-Tipp

Outdoors
BEST
BUY

- The only stove with integrated 4 Season Mode makes it possible to cook in cold weather conditions
- Ultra low rugged profile design provides superior stability
- Widest pot support in its class allowing for convenient cooking even with large pots
- Folding pot support legs and folding integrated canister stand allow ultimate compactibility
- Includes adjustable windscreen with rounded corners for use in windy, cold and harsh conditions

The **OPTIMUS VEGA** is a high-performing remote canister stove with an integrated 4 Season Mode for ultimate performance. When cooking in cold temperatures or when extra fast boil times are needed, just open the gas canister support legs, turn the canister upside down and continue cooking.

Art. # 8018505

OPTIMUS CRUX

GAS

- Extremely compact, folding burner head
- Excellent simmering control
- Powerful burner head providing 3000 W
- Wide burner head for better dispersion of the flame ensures better simmering capability

The **OPTIMUS CRUX** packs down to nothing and is the only stove that nests in unused space under the fuel canister - thanks to an innovative folding burner head and the convenient strap on the protective stuff bag. A technical wonder designed for weight chasers who refuse to compromise cooking performance. Enjoy every meal!

Art. # 8016273

OPTIMUS CRUX LITE

- Low gravity point on pot support
- Turbine shaped legs
- Best performance with Optimus gas canisters
- All activation points in green color
- Shaped control handle for superior packability

The **OPTIMUS CRUX LITE** is one of the world's lightest stoves - only 72 grams! Similar to best selling Crux but does not fold as flat. It boils water fast, but won't spot burner while simmering.

Art. # 8016272

OPTIMUS CRUX LITE PIEZO

GAS

- Low gravity point on pot support
- Turbine shaped legs
- Handheld piezo device "Sparky": The easy and reliable way to light your stove
- All activation points in green color
- Shaped control handle for superior packability

The **OPTIMUS CRUX LITE PIEZO** is a powerful burner for fast boil time. One of the lightest stoves in the world. Syringe style piezo ignitor "Sparky" for easy ignition of the stove.

Art. # 8018914

OPTIMUS ELEKTRA FE COOK SYSTEM

GAS

- Powerful burner head providing 3000 W
- Handheld piezo device "Sparky": The easy and reliable way to light your stove
- Hard anodized aluminum clip-on windshield
- Due to its compact size the Elektra FE Cook System fits easily into a day pack and adds hardly any weight

The **OPTIMUS ELEKTRA FE COOK SYSTEM** uses less fuel and at the same time is more powerful than other systems. The Elektra FE Cook System consists of the Crux Lite gas stove (3000 W), a heat exchange pot with a lid, a convenient clip-on windshield (which reduces gas consumption and boil time) and a handheld piezo ignitor "Sparky".

Art. # 8018921

OPTIMUS

ULTRA LIGHT COOK SYSTEMS

- Low gravity point on pot support
- Turbine shaped legs
- Best performance with Optimus gas canisters
- All activation points in green color
- Shaped control handle for superior packability

The **OPTIMUS CRUX LITE** and the **CRUX** are available as space-saving bundles with matching cook sets. These cook sets have been designed to accommodate the stoves and a 100 g or 230 g Optimus gas canister (not included in the bundle).

OPTIMUS (H)EAT INSULATION POUCH

The **OPTIMUS (H)EAT INSULATION POUCH** is the perfect solution for eating outdoors. Its unique design keeps your freeze dried meals warm 25% longer when used with a food pouch or cooking pot. Plus, the (H)EAT Insulation Pouch has slip-in side pockets that allows you to eat directly from a food pouch - without burning your fingers.

Art. # 8018269

OPTIMUS (S)EAT

The **OPTIMUS (S)EAT** is a foldable, lightweight seating pad for the true outdoor chef. Sit warm and dry anywhere while cooking! Complete with helicopter hand signals for any emergency.

Art. # 8018912

OPTIMUS SPARKY

Handheld piezo device: the easy and reliable way to light your gas stove. Lanyard included.

Art. # 8018913

OPTIMUS BURNY

Powerful butane/propane gas lighter. The most convenient way to light up any camp stove or camp fire. Wind resistant and adjustable flame. Refillable from a standard butane refill can or from your screw valve canister (adapter sold separately). Extra large fill level window.

Art. # 8018911

OPTIMUS

CLIP-ON WINDSHIELD

Lightweight, hard anodized aluminum clip-on windshield for use with canister mounted stoves. Increases stove efficiency and substantially reduces gas consumption. Fits every gas canister according to EN417 and pots with a max. diameter of 13 cm. Compatible with standard pots and high profile heat exchange pots. Easy packability (fits around the Optimus Terra Weekend HE pot).

Art. # 8018907

OPTIMUS

WIND FOIL FOR VEGA

This wind foil is quickly fitted around the stove and adjusts perfectly to the size of the pot due to its two setting positions. This improves the efficiency of cooking and makes sure that your outdoor meals will be a success even in harsh conditions. The corners of the windshield are rounded, making it easier for handling.

Art. # 8018802

www.optimusstoves.com

OPTIMUS WIND FOIL

Decrease boiltime and save fuel when cooking with this light weight aluminum wind screen. Included with the Optimus Nova and Nova+ stoves.

Art. # 8016302

OPTIMUS CANISTER STAND

Foldable gas canister stand to increase stove stability for safer cooking. Fits small and large gas canisters up to 450 g (16 oz).

Art. # 8018910

OPTIMUS TRANGIA ADAPTER

Users of the Trangia stove who are looking for multifuel stove performance will appreciate the Optimus Trangia Adapter. With this simple adapter you can convert the Optimus Nova and Nova+ stoves to fit into a Trangia stove.

Art. # 8016303

OPTIMUS

BOB

Lightweight outdoor sponge. Scratch free cleaning for all pots & pans.

Art. # 8019010

OPTIMUS

FUEL PUMP

Durable Flipstop aluminum fuel pump and quick connect fittings for increased safety and ease of use.

Art. # 8018463

OPTIMUS

FUNNEL

Avoid spillage and dirt in your fuel. The Optimus Funnel is equipped with a gauze filter.

Art. # 8016301
