The Multi-Star range of luminaires is named for its multitude of light and fitting options.

The 8042 small round Module fittings are a compact adjustable recessed downlight fitting consisting of a 80mm round x 42mm high frame that has the option of being black or white.

This type of frame is commonly used over reception counters and for accent lighting tasks such as highlighting decorative objects.

SL-MSM12W3K-8042WH-BA40

Starco lighting - multi-star module 12 watt 3000k (warm white) - 8042 white frame - Beam angle 40°

**Other fitting options:**

**Product case study and code explanation:**

Lets say you have a shop that sells flower vases displayed on medium size round tables. Your ceilings are black and 4 meters high with the light fittings positioned above your product but they are off centre. Therefore you need an adjustable fitting to shine onto your vase.

Based on your store aesthetic you choose a '100mm adjustable black fitting with 90 degree cut out' and a '40° beam angle' will be perfect to shine on the vase table. You want it to be bright and are not worried about glare so a 'direct beam angle without low glare lens is ok'. You want a crisp 'warm white (3000k) light with high colour reproduction' to highlight the colours in the vase. Below is your product code.

**SL-MSM12W3K-8643BK-BA40RRG**
