# Sleep Play Go

#### **Getting Started**

Allow your pet to play and sleep around and in Sleepypod for at least a week before using it as a carrier. When you introduce the Sleepypod to your pet, start

with the top removed. Toys and treats can be placed in and around the bed to encourage use. In cool weather try adding our optional Warmer Kit. The more positive associations your pet creates with Sleepypod as a bed, the more your pet will enjoy it as a carrier.

Next, zip the top on and tuck open the center. Many pets will enjoy the privacy and prefer the top always left on.

As your pet becomes more comfortable in their Sleepypod, zip your pet in and go for a quick walk around the room while encouraging your pet verbally. Put your Sleepypod back down and open top to allow your pet to exit freely. Repeat several times to acclimate your pet to traveling in the Sleepypod before undertaking any major travel.

#### Accessories (Sold Separately) — — — — —

#### Warmer Kit

The Sleepypod Warmer Kit will provide safe and efficient warmth up to 102°F/39°C when plugged in at home or in the car. It will only feel slightly warm to the touch when properly installed between the Ultra Plush bedding and the foam liner.

When not in use unplug the adapter and tuck the end of the cord inside the bedding.

### Air Mesh Bedding

For warmer weather the Air Mesh can replace the Ultra Plush bedding, suspending your pet above the base. We chose a highly durable polyester mesh that allows air circulation all around your pet.

Air Mesh can be conveniently stored underneath the foam bed when you are using the Ultra Plush Bedding and is easily maintained with a quick vacuum or wipe with a damp cloth.

Keep the top

zipped closed

to keep your

pet safely

inside.

#### Car Travel

Place your Sleepypod in a seat without airbags or with the airbags disabled.

Wrap the seat belt around the Sleepypod.
