Initially co... by the school.

- Manage student information system
- Used for student information
- Maintains records of student information for new students
- Liaison between students and management for new students
- Establishes protocols for new students and support.
- Maintains records of student information, data
- Maintains records of student information, data
- Maintains records of student information, data

Carried out a comprehensive literature search and documented short-term and long-term outcomes. Gained approval for several studies. The studies included:

- Upgrade the network, rebuild the AD infrastructure, and build a new network. This initial investment was significant.
- Migrate the applications, including the ERP system, to the new infrastructure.
- Implement a new security policy and then to implement a new remote access solution.
- Implement a new backup strategy, moving to thin clients and reducing refresh costs by 50%.
- Implement a new networking aspects and technology enhancements for, and supporting new
