

10 FINE JEWELLERY DESIGNERS YOU SHOULD KNOW AT COUTURE

by [Liza Urla](#) on June 20, 2016:

[NEHA DANI](#)

Neha Dani brought something unique to the jewellery world. Fresh, never the same, modern before their time, her jewels are something I could study for hours. An artist who takes great pride in the details, Neha's unique perspective reveals a different side and emotion at every turn. At once bold and dramatic, but feminine and beautiful, you'll marvel over her creations and get lost in their story. Neha's high jewellery collection is a wonderful array of sculptural masterpieces in 18-karat gold with colourless and natural fancy coloured diamonds. Each piece is charged with emotion and natural beauty and an abstract feel. There's a popular theme of dried leaves and flower petals that repeats itself in many beautiful variations.

Neha carves each creation from a wax model before creating her magnificent multi-layered undulating designs. She then hand selects the diamonds for each piece that will be meticulously set by a master craftsman using traditional technique and modern technology. Every design from start to finish is an incredible undertaking of mastery and labour.
