

## Tennis Racket Hanger Installation and Cabinet Hanging Instructions

How To Videos available at [www.youtube.com/sfdisplay](http://www.youtube.com/sfdisplay)

### PARTS:

- 1 gold hanger w/ 2 screws
- 1 packet mounting hardware and keys

**Step 1:** Test fit hanger with tennis racket in place to find the most ideal location to mount in the cabinet.

**Step 2:** Use a screwdriver or power tool to attach the hanger with the screws to the inside back panel.

**Step 3:** To install the wall mounting hardware, install the left and right Tear-Drop brackets to the top corners to the back of the cabinet with the provided small brass screws. There are pre-drilled holes to match the brackets.

With a measuring tool, measure the distance between the 2 holes of the left and right Tear-Drop brackets. After locating where you will be displaying the cabinet, measure out the same recorded distance onto the wall. It is important that your measurement is accurate as this will make the attachment easier later.

Install the 2 large black screws into the wall. Use the 2 plastic hollow wall anchors if your wall material requires.

**Step 4:** To hang the cabinet on the wall, simply position the cabinet over the top 2 screws and align with the holes of the Tear-Drop brackets. Slide down the case and have it rest on the brackets. Now you are ready to use the cabinet to display your items.
