Porch Bag

1x porch canvas

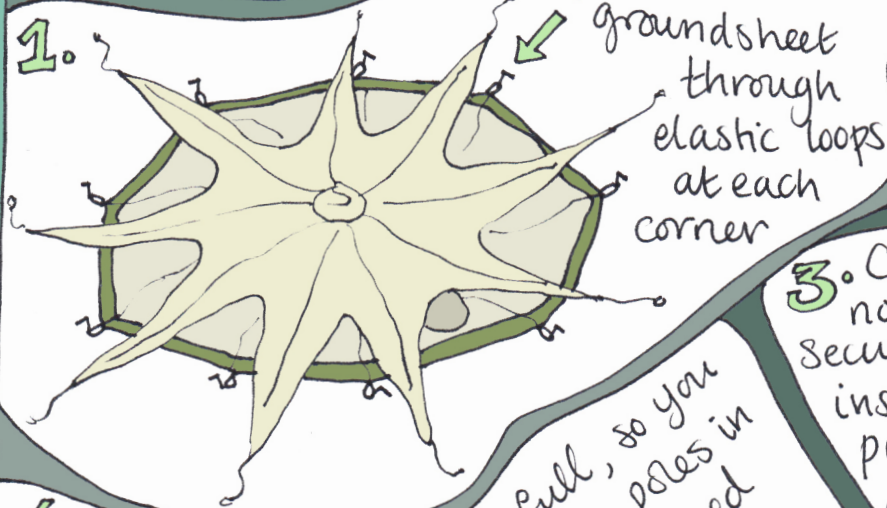

8x smooth steel pegs

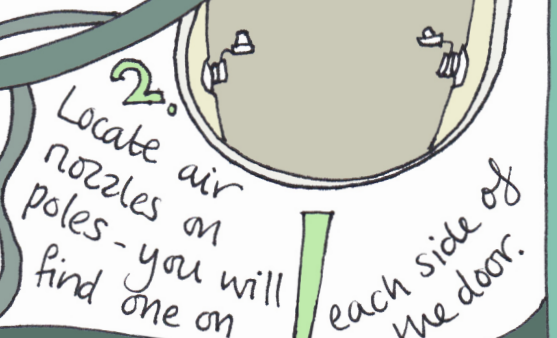

Welcome to your wonderful new Lotus Air Belle

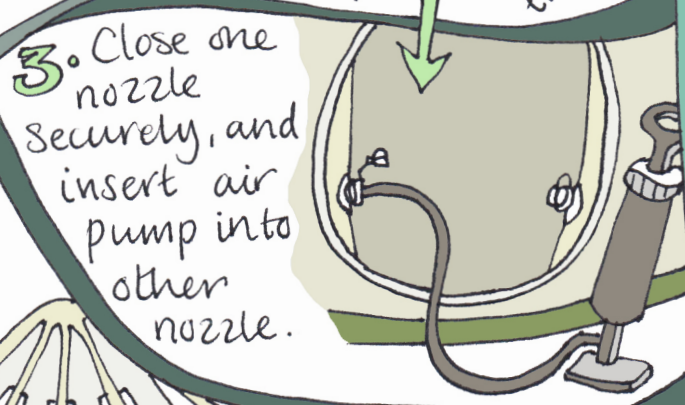

How to pitch your tent

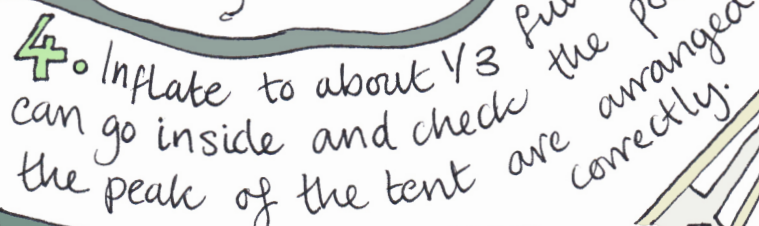

1. Peg out groundsheet through elastic loops at each corner

2. Locate air nozzles on poles - you will find one on each side of the door.

3. Close one nozzle securely, and insert air pump into other nozzle.

4. Inflate to about 1/3 full, so you can go inside and check the peak of the tent are arranged correctly.

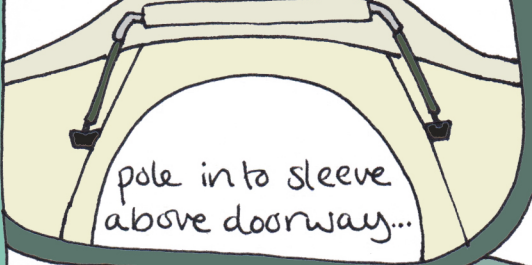

5. Fully inflate until all the poles are rigid - until it becomes difficult to pump more air in with the hand pump.

★★★★

6. Insert fibreglass 'hood'

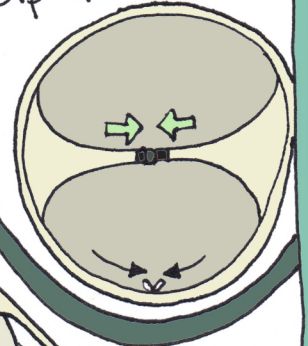

pole into sleeve above doorway...

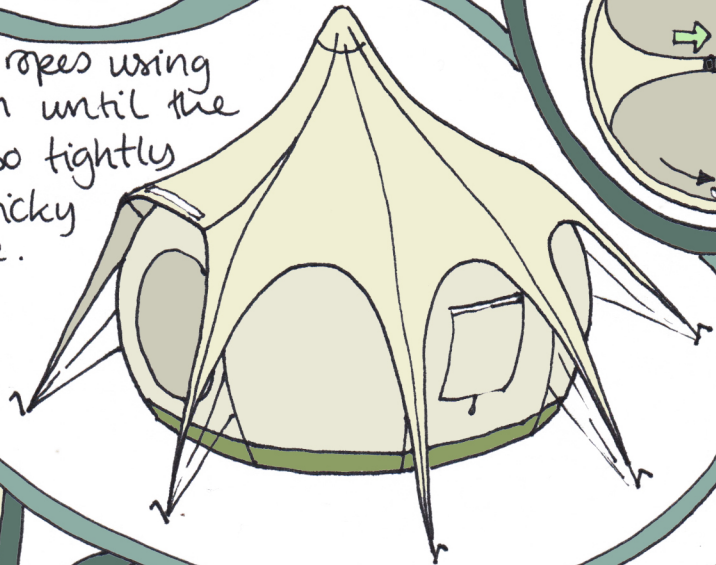

7. ... And insert ends of pole into webbing eyelets on either side of door

8. Clip the buckle together across the front door, then zip closed.

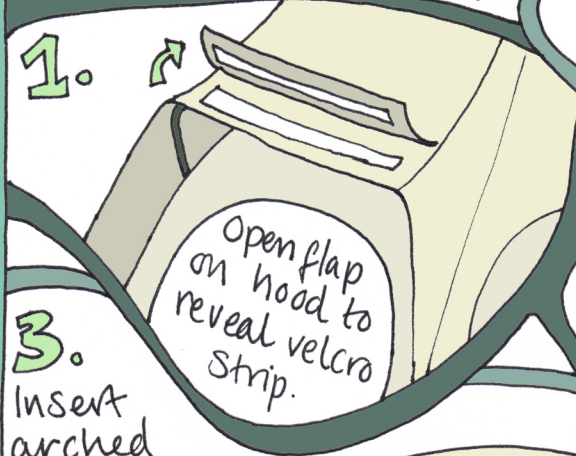

9. Peg out roof + wall guy ropes using remaining pegs. Tighten until the tent feels rigid, but not so tightly that the door becomes tricky to close.

PORCH:

1.

Open flap on hood to reveal velcro strip.

3.

Insert arched pole section into sleeve on front edge of porch.

2. fix velcro strip on rear of porch canvas on to the hood of your tent.

4.

Attach straight side poles to arched pole.

5. Secure side poles in place using velcro straps.

6.

locate pins at base of porch in to the bottom of side poles.

7. THE END!

Peg out front two pegs first, then middle two pegs, using webbing strap to guide the width, then rear two pegs. Then unclip + fold away webbing strap.
