SIGNET RING SIZING GUIDE

Make sure your print scale is set to $100 \%$.
To verify that the ring sizer printed correctly, measure this line with a ruler, it should measure 20 mm .

Please note; this guide will indicate your approximate finger size. The most accurate way to determine your correct finger size is to have it measured at any jewellers. We throughly recommend this if it is an option.

These shapes indicate the approximate size of the face of your ring depending on your finger size.

If you already have a ring that fits your finger, place the ring on top of these circles until you find your perfect match.

Measure against the inside of your ring.
