

**AKTOPA**

*Global Chemical Solutions*

## VISION:

To be a leader in the distribution of chemical solutions across multiple industries and geographic locations.

## MISSION:

To forge lasting relationships and focus on optimizing value, throughout the global chemical supply chain, for all our customers. Our mission will be achieved and sustained through the combined talents and concentrated efforts of all Aktopa team members whose daily activities will be rooted in honesty and integrity.

Since 2000, Aktopa, LLC (Aktopa) has been delivering quality chemical products primarily to the US and Mexican market with efficiency and care. Aktopa remains versatile given the dynamic impacts of short-term cyclical factors as well as longer-term structural forces that affect the industries we serve and the corresponding local, regional and global supply / demand fundamentals.

Game changing trends will continue to provide us with unique opportunities and innovation will play an important role in order to address the challenges in food production, mobility, water management, lifestyle changes and responsible stewardship of limited natural resources, to name a few social trends. Innovation will continue to guide our Adapt and Adopt mentality at Aktopa.

Notwithstanding evolving trends, what will not change is our commitment to perform with excellence and integrity, to achieve complete customer satisfaction, providing our customers with the products and services they need, when they need them.

Aktopa will continue to value and embed the diversity of culture and the diversity of thought in day to day interactions, embracing ideas from customers, suppliers and colleagues so that we better understand and fulfill our customers' needs.

Aktopa will continue its long lasting journey that is underpinned by the principles and behavioral expectations outlined in this Code. The foundation for our continued success and the strength of our enduring relationships will be determined in large part by our commitment and adherence to our Code of Conduct.

Sincerely,
