

Odd and even animals 11-15!

Find fantastic learning packs, including Giggly Maths magazine, at giggly.co.uk

Open the doors to meet animal friends, and learn odd and even numbers.

Grown-ups! help your child to snip out the doors on this sheet and stick them over the doorways on the next sheet, so they can open and close. The door number should match the number of animals behind it.

The arrangements of the animals will help your child to learn odds and evens visually. You can also use this sheet to try subitising - recognising a number of objects without counting them.
