

WE110

GSM/SMS mini controller

Universal and compact remote control device, to manage via SMS or App any electronic device and receive alarms and notifications directly on Smartphone.

THERMOSTAT

It allows to set home temperature or to program it on weekly basis. Thanks to WE110 the heating/cooling system at home is always available and under control.

UNIVERSAL REMOTE CONTROL

WE110 turns on/off remotely, or according to a preset weekly program, any electric devices (lightings, irrigation systems, actuators, alarms and many other).

It communicates with the system to control the status and send notifications.

GATEOPENER

It opens and closes electric gates or doors with a simple command (free-call) from the smartphone. It can manage up to 120 authorized users.

WITH BACK-UP BATTERY

WE110 sends automatically an SMS alarm in case of power-failure and when the power restores.

TECHNICAL SPECIFICATIONS	
Modem	2G quadband, GSM antenna included
Power supply	Low voltage 12-24VAC/9-32VDC, power supply unit included
Internal battery	Optional - Sends an SMS alarm when power fails
Consumption	100mA average, 400mA in transmission
Input/Output	1 analog input for temperature probe (NTC 10 K Ohm included) for the thermostat version 1 dry contact digital input, for the universal remote control and gateopener version 1 relay output (1A-230VAC / 1A-30VDC)
Enclosure	Plastic with magnets
Dimensions(LxWxH)	40 x 23 x 85mm
Weight	52 g
Operating temperature	from -15°C to +55°C
Storage temperature	from -25°C to +85°C
Humidity	0% - 80% (non condensing)

Easy
easy to use and to program

Programmable
via App or SMS

Green
it helps to prevent energy wastage

Secure
it allows and enables only the authorized users
