* the above operation can be done with any left or right earphone

Product Specifications

Product name: AP2 wireless bluetooth headset

Battery capacity: 35mAh charging bin 300mAh

Charging voltage/current: 5V~1A

Frequency response range: 20hz-20khz

Impedance of products: 16 Ω soil by 15%

Sensitivity: 103+3dB At1000Hz at0.126v

Operating/storage temperature: -10°C-50°C

Battery life: music play about 240 minutes/talk time

about 240 minutes/standby time about 240 hours

Reception distance: 15m (standard environment)

Weight: 38g (charging case) 6.7g (binaural)

Transmission range: 2402-2408MHz

Support protocol: HSP/HFP/A2DP(SBC, AAC/AVRCP

Transmission frequency: 24GHz band

(2.4000-2.48356Hz)

Charging time: 45 minutes for earphone, 60 minutes for charging bin

Product size: 44x21x53(mm)

* the above data is for reference only, the specific object shall prevail

Matters needing attention

Please store and use this product at room temperature.

Do not expose this product to rain or moisture.

Do not throw, avoid product damage caused by falling

Do not discard it at will, or put it at high temperature

(temperature above 60 degrees) and fire to avoid danger;

Do not disassemble, repair or modify this product yourself.

Do not use chemical solvent to wipe this product

If not used for a long time, please charge the product once every 2 months

Use tips to share

- ① Because of the 2.4GHz radio wave used by Bluetooth, the equipment using this band is more common (such as wireless WIFI, etc.), the headset is easily interfered, and there may be discontinuities, which is correct. If you are unable to recover, stay away from this environment or reconnect.
- ② After the Bluetooth headset is turned on, it will automatically connect to the phone that was paired last time. If you want to pair with another phone, please turn off the Bluetooth of the original phone. When the Bluetooth headset is turned on, other phones can search for devices by turning on Bluetooth.
- ③ When not using the headset, put the headset in the charging compartment, and the headset will automatically shut down and recharge the battery. If you do not have a charging compartment, you can manually disconnect the Bluetooth connection, and the headset will automatically shut down after about 5 minutes.
- ④ If you feel that the sound quality is poor for the first time, there is no heavy bass, or it is uncomfortable to wear and easy to fall, etc. It is recommended that you move and adjust the earphones to make the sound outlet closer to the ear canal.
