Downloading the App

You can download the App in the following two ways.

1. Scan the following QR code to download and install the App.

2. Enter "DA FIT" in App Store or Google Play to download the App.

Da Fit

Pairing

Open the App and set up your profile

Go to "Device", and tap "Add A Device"

Choose your device on the scanning list

Complete

The MAC address found on the "Settings" → "About" page can assist in scanning QR codes and identifying your device on the scanning list.

TIPS:

1. To avoid pairing failure due to insufficient battery, it is important to keep the watch's battery level above 20% before initiating pairing.
2. During the process of pairing and connection, ensure that your mobile phone's Bluetooth is turned on and within the effective connection range of the watch.
3. This device requires a system version of Android 6.0 or higher, or iOS 9 or higher.
4. When using Da fit for the first time, please grant it access to Bluetooth, location services, and any other necessary permissions on your compatible smartphone.

Android Phone

1. Set up your profile
2. Go to "Device", and tap "Add A Device"
3. Choose your device on the scanning list

4. Confirm Connected 5. Select "Allow access to your contacts and call history", then tap "Pair" to confirm pairing

Notes:

It takes 3-5 seconds before you can access the pairing interface.

iOS Phone

1. Set up your profile
2. Go to "Device", and tap "Add A Device"
3. Choose your device on the scanning list

4. Confirm Connected

5. Tap "Pair" the in Bluetooth pairing request page to enable Bluetooth

6. Select "Allow" to allow N27 to receive your iPhoto notifications

Note: After successfully connecting your smartwatch to the App, please follow these steps to enable Bluetooth calling in case you cannot find the Bluetooth pairing request or accidentally tapped "CANCEL".

Tip: This feature is specifically designed for Android and iOS phones.

1. Find the Bluetooth function in your phone's settings page, toggle the switch to turn it on, then select the N27 device to establish a connection

2. Select "Allow access to your contacts and call history", then tap "Pair" to confirm pairing

3. Bluetooth connected

4. The watch features a phone call function that is readily available

Use the Touch Screen

Main Interface Switching

1. To enter the selection dial interface, long-press the main interface for 3 seconds. Slide left or right to navigate through the available options, and click to confirm your selection.

2. Find more dials: Enter the “Da fit” App and tap “dial selection” > more dial settings.

Smart Watch Features

Activity

When wearing the watch regularly, it will provide you with real-time information about your exercise progress including steps taken, distance covered, and calories burned.

Note: This data is updated daily before 12:00 a.m., reflecting the activities of the previous day.

Sleep

If you keep wearing Smart Watch during your sleep, it can provide you with valuable information about your sleep duration and quality. This data is conveniently displayed on both the device's screen and the App.

Note: Sleep stats reset to zero at 8:00 pm.

Call Bluetooth connection

Turn on the Smartwatch, and the "N27" Bluetooth pairing will pop up automatically in your phone. Please tap "Pairing" to establish the connection. When Bluetooth is connected to your phone, you can use the watch to dial, control the mobile phone to make a call, listen to music, and view the call record information on the watch.

Phone Call function

Add contacts:

Open Dafit from your phone to tap "Favorite Contacts" → "Add quick newsletter". You can add up to 8 contacts.

Exercise

107 sports modes to choose from, including walking, running, cycling, basketball, football, badminton, skipping, and rope exercises. To activate a sport mode, simply turn it on and swipe left to select the option to pause or end the exercise. If you wish to add a new sport mode, scroll down to the bottom and click "Add" to select your desired option.

Heart Rate Test

The Smart Watch could record your heart rate all day.

You can also tap on the page to start measuring your heart rate.

SpO2 Test

Tap the SpO2 page to start measuring your SpO2.

On the SpO2 page, you can access the recently measured data of your SpO2.

Weather

It can show the weather info including location, and sunrise, and sunset.

After connecting to the app, the weather information is synced and will not update if there is a long period of disconnection.

Slide up the weather interface to view the weather conditions in the next 6 days.

AI voice

The voice assistant is a smart phone application. You can open it to command your phone through smart dialogue, such as sending a message to make a call.

Remote Shutter

After connecting to the device, you will be able to effortlessly control the Smartwatch using your phone from any location.

Relaxation

This feature facilitates efficient breathing and strengthens the respiratory muscles. Engaging in deep breathing exercises can greatly aid in relieving stress.

Notifications

This watch offers support for phone calls, text messages, social media apps such as Facebook, Twitter, WhatsApp, and Skype, as well as other application notifications. The watch's page can store up to 8 information records at a time.

Note: You can switch on/off the incoming notification in the App.

Other function interfaces

Other functions of the watch include Stopwatch, Alarm, Timer, Flashlight, Game, Calculator and Find Phone.

Setting

Options include Display, Vibration & Ring, Phone call, DND Mode, Audio Bluetooth, Low Power Mode, Phone Reset, System, and About.

On the Setting page, you can choose to mute or unmute notifications of Phone call, DND Mode, Audio Bluetooth, and Low Power mode.

General Info & Specifications

1. Product parameters

Tip: Fits wrists with a circumference ranging from 5.5 to 7.7 inches

2. **Model:** N27

3. **Charging method:** Magnetic suction charging

4. Environmental Conditions

Operating temperature: 14 to 122 (-10 to 50)

Non-operating temperature: -4 to 140 (-20 to 60)

5. Waterproof rating

This device is rated IP69K for waterproofness, however, it is advisable to avoid prolonged immersion in water.

6. Battery

The 350mAh polymer lithium-ion battery can standby for up to 40 days and provides a normal usage duration of 7-8 days.

Common problem handling

1. Watch won' t turn on

- Please press and hold the power button for more than 3 seconds.
- Maybe the battery is too low, please charge it in time.

2. Bluetooth is not connected or unable to connect

- Please try to restart the watch and reconnect.
- Please try to restart the phone's Bluetooth and connect again.
- Do not connect the phone to other Bluetooth devices at the same time.

3. Inaccurate heart rate/Sleep/blood oxygen measurement

- Generally, this issue arises due to inadequate contact between the watch's sensor and the human body while measuring.
- Please make sure that the sensor is in full contact with your wrist during measurement.

- For accurate measurement, please ensure that your body remains still and keep the watch close to your wrist.
- For individuals with darker skin tones and more hair on their arms, there is a phenomenon of inaccurate testing.

4. Sleep data is not accurate enough

- Sleep monitoring aims to replicate the natural process of falling asleep and waking up, requiring the device to be worn as one would do during regular sleep.
- Wear it when you fall asleep too late or when you fall asleep, errors may occur.
- Sleep data is exclusively monitored during the night, and the default sleep monitoring period spans from 10:00 pm to 8:00 am the following morning.

Precautions

1. Do not disassemble, repair, or modify the product without authorization.
2. Do not violently bump the product to prevent it from damage.
3. Please avoid exposure to strong magnetic fields, direct light, or high-temperature environments.
4. The device, accessories, heart rate monitor, blood oxygen level measurement and related data are intended to be used only for recreational purposes and not for medical purposes and are not intended to diagnose, monitor, treat, cure, or prevent any disease or condition.

The heart rate and blood oxygen level readings are for reference only, and no responsibility is accepted for the consequences of any erroneous readings.

While the optical wrist heart rate monitor technology typically provides the best estimate of a user's heart rate, there are inherent limitations with the technology that may cause some of the heart rate readings to be inaccurate under certain circumstances, including

the user's physical characteristics, fit of the device, and type and intensity of activity.

5. The device relies on sensors that track your movements and other metrics. The data and information provided by these devices are intended to be a close estimation of your activity and metrics tracked, but may not be completely accurate, including step, sleep, distance, heart rate, blood oxygen and calorie data.
6. Please ensure that you don't wear the watch strap too tightly and remember to keep the area where the watch comes into contact with your skin clean.
7. Please refrain from wearing this watch while taking a hot bath. The temperature of the bathwater is significantly high, leading to the generation of a substantial amount of water vapor. Water vapor exists in a gaseous phase and possesses small molecular radius. As the temperature subsequently decreases, this vapor can easily permeate through any gaps in the watch shell.

Once it cools down further, it will condense back into liquid droplets. This condensed water may then accumulate within the watch, potentially causing damage or malfunction.

8. It is important for children to use this product under the guidance of their parents in order to prevent any potential harm.
