INTIM & REPRODUCTIVE CARE FOR WOMEN

YOUR HEALTHY SUPPORT!

PREGNA MAX

DIETARY SUPPLEMENT

Pregna Max contains gastro-resistant alpha-lipoic acid, magnesium, docosahexaenoic acid (DHA), zinc, copper and vitamin B6. Alpha-lipoic acid has antioxidant and anti-inflammatory effects, reduces contractions and prevents premature cervical relaxation, premature birth and miscarriage. Magnesium relaxes muscles, reduces cramps and the possibility of premature contractions, contributes to the normal function of the mother's nervous system and protects the baby's nervous system.

Indications:

- Prevention of miscarriage and premature birth
- Prevention of uterine contractions and premature dilatation
- Feeling of cramps and hard stomach
- Pregnancies achieved after the age of 35
- Pregnancy achieved by in vitro fertilization of the cervix
- Pregnancy maintenance after tocolysis
- Present experience with miscarriage or premature birth earlier in life
- Established twin pregnancies
- Preservation of physiological pregnancy

Supplemental Facts:

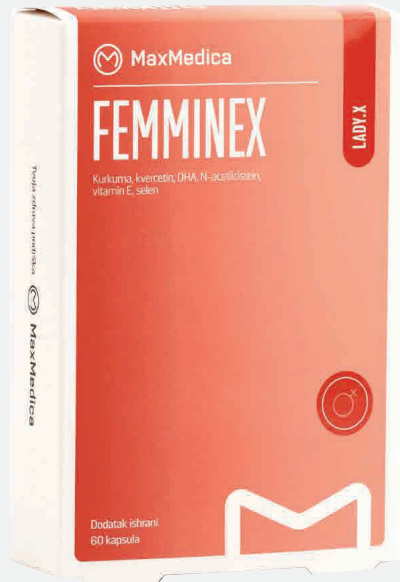

Active Ingredient	1 capsule	RDI*	2 capsules	RDI*
Alpha-lipoic acid	300 mg	/	600 mg	/
Magnesium	175 mg	47%	350 mg	93%
DHA	100 mg	/	200 mg	/
Zinc	3,25 mg	32,5%	6,5 mg	65%
Vitamin B6	1,3 mg	93%	2,6 mg	186%
Copper	0,325 mg	32,5%	0,65 mg	65%

*RDI - Reference Daily Intake

Suggested Use:
1 capsule a day,
during meals and
with plenty of fluids.
One Pack: 30 capsules

FEMMINEX

DIETARY SUPPLEMENT

Femminex contains dry extract of curcuma rhizome, quercetin, DHA, N-acetylcysteine, vitamin E and selenium. Quercetin and turmeric contribute to the reduction of growth and expansion of endometrial tissue, have anti-inflammatory and antioxidant effects, relieving pain that occurs due to endometriosis or painful menstrual cycles. N-acetylcysteine has antiproliferative and antioxidant effects, reducing the size of growths and cysts. DHA inhibits prostaglandin synthesis and thus relieves pain.

Indications:

- Adjuvant therapy for endometriosis
- Preventive in remission
- In order to alleviate the symptoms of dysmenorrhea

Supplemental Facts:

Active Ingredient	1 capsule	RDI*	2 capsules	RDI*
Turmeric root extract (Curcuma longa) standardized to 95% curcumin	105 mg	/	210 mg	/
<i>curcumin</i>	99,75 mg	/	199,5 mg	/
Quercetin (Sophora japonica)	100 mg	/	200 mg	/
DHA	100 mg	/	200 mg	/
N-acetylcysteine	75 mg	/	150 mg	/
Vitamin E	4,02 mg αTE	33,5%	8,04 mg αTE	67%
Selenium	50 µg	91%	100 µg	182%

*RDI - Reference Daily Intake

Suggested Use:
 Adjuvant therapy for endometriosis:
 2 capsules daily, with a meal, in cycles of 3 months (with a base of one month between cycles) in remission and in dysmenorrhea 1 capsule daily in cycles of 3 months (with a break of one month between cycles).
 One Pack: 60 capsules

FERTIL MAX GEL

MEDICAL DEVICE

Active Ingredients: Sodium hyaluronate, Lactic acid, Inositol, Zinc gluconate, Magnesium citrate, Calcium pyruvate, Carnitine, Creatine, Sodium chloride.

Through synergistic action, the active ingredients enable:

- o Creation of an optimal environment for spermatozoa
- o Maintaining a pH value suitable for natural conception
- o Achieving an osmolarity that is compatible with the seminal fluid

Indications:

- Unexplained infertility
- Changes in cervical mucus (reduced production and/or changed pH value)
- Low survival rate of spermatozoa

Suggested Use:

Use the product in the ovulation phase, during the most fertile days of the cycle (13th, 14th, 15th day). Apply the gel 5 minutes before sexual intercourse.

One Pack: 6 single-dose applicators of 5 ml each

PROBIOVAG

MEDICAL DEVICE

Active Ingredients: Lactobacillus acidophilus, Lactobacillus reuteri, Lactobacillus casei

A combination of inanimate, tyndalized Lactobacillus layers contributes to:

- o Stimulation of the natural immune response
- o Preventing adhesion of pathogens
- o Establishing and preserving the balance of the vaginal microflora (when its balance is disturbed due to infections, inflammation, pregnancy, childbirth, use of antibiotics, contraception, frequent use of tampons, improper intimate hygiene, lifestyle)

Indications:

- Violated balance of vaginal microflora
- Vaginitis
- Preventive with antibiotic or hormone therapy
- In order to preserve the health of the vaginal microflora (preventive or prophylactic)

Suggested Use:

Use Vagitories for 7-10 days continuously, starting from the last day of the menstrual cycle or according to the doctor's advice.

One Pack: 10 vagitories

MENO FLAVON

DIETARY SUPPLEMENT

Alleviates the symptoms of menopause

Meno Flavon capsules contain extract of red clover (*Trifolium pratense*) standardized to 40% isoflavones, calcium, vitamin D3, vitamin K2, magnesium, standardized extract of valerian root (*Valeriana officinalis*) and St. John's wort flower extract (*Hypericum perforatum*). Red clover is a very rich source of isoflavones, which have physiological activity similar to estrogen and act protectively, alleviating all symptoms of menopause.

It's recommended to use Meno Flavon capsules in menopause, in order to alleviate the symptoms like:

- Hot flashes
- Fatigue and exhaustion
- Mood change
- Sleep disorders and poor sleep

as well as reducing the risk of:

- Osteoporosis
- Cardiovascular diseases

Suggested Use:

1 capsule for the day in the morning and 1 capsule for the night in the evening.

One Pack:
60 capsules (30 capsules for the day and 30 capsules for the night)

Supplemental Facts:

Active Ingredient (capsule for day)	1 capsule	RDI*
Extract of red clover (<i>Trifolium pratense</i>) standardized to 40% isoflavones	100 mg	/
- isoflavones	40 mg	/
Calcium	200 mg	25%
Vitamin D3	800 IU/20 µg	400%
Vitamin K2	75 µg	100%

Active Ingredient (capsule for night)	1 capsule	RDI*
Magnesium	300 mg	80%
Standardized extract of valerian root (<i>Valeriana officinalis</i>)	80 mg	/
- valerian acid	0,64 mg	/
St. John's wort flower extract (<i>Hypericum perforatum</i>).	100 mg	/
- hypericin	0,3 mg	/

*RDI - Reference Daily Intake

LADY.X

TETRAFOL

DIETARY SUPPLEMENT

For proper development and growth of the fetus

Tetrafol contains 600 Qg of 5-methyltetrahydrofolate in one tablet. 5-methyltetrahydrofolate is the active form of folic acid, that directly participates in genetic material (DNA and RNA) and amino acids synthesis. It's important for proper growth and development of the fetus, as well as for the formation of healthy red blood cells and cell division.

Tetrafol is recommended for:

- Women who plan pregnancy
- Pregnant woman
- Every woman in the reproductive period
- Anemia caused by folate deficiency

Supplemental Facts:

Active Ingredient	1 tablet	RDI*
5-methyltetrahydrofolate	600 µg	/

*RDI - Reference Daily Intake

Suggested Use:
1 tablet a day, in the morning.
One Pack: 60 tablets
