NOT A RENDER

ADVANCED SIMRACING
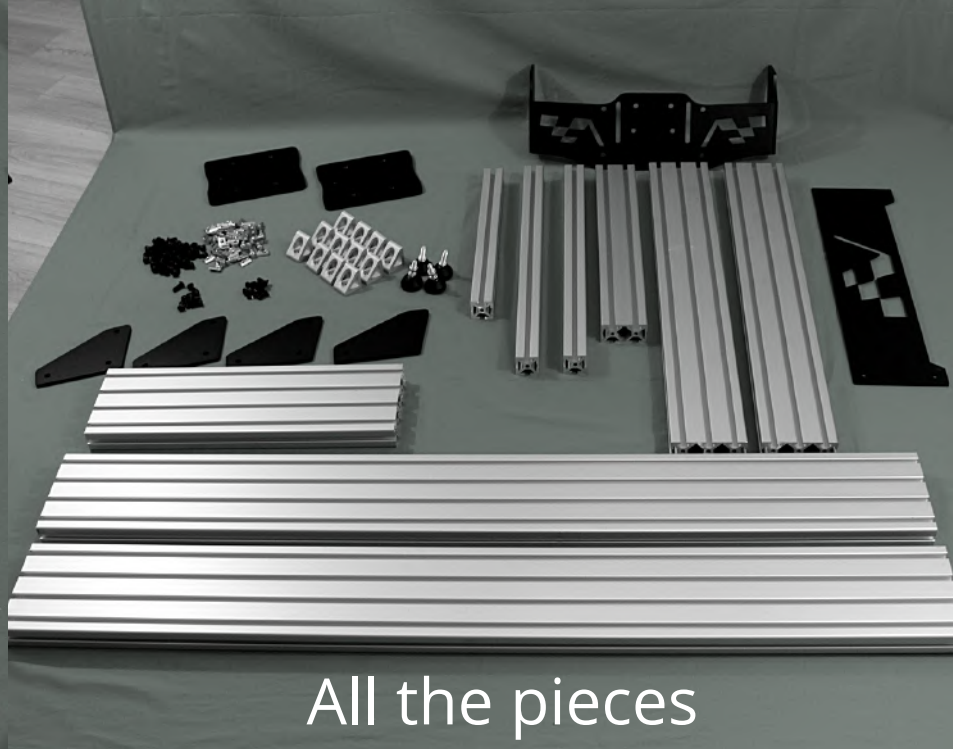

# ASR6 ASSEMBLY GUIDE

Tools
- measuring tape
- allen key 3/16

All the pieces
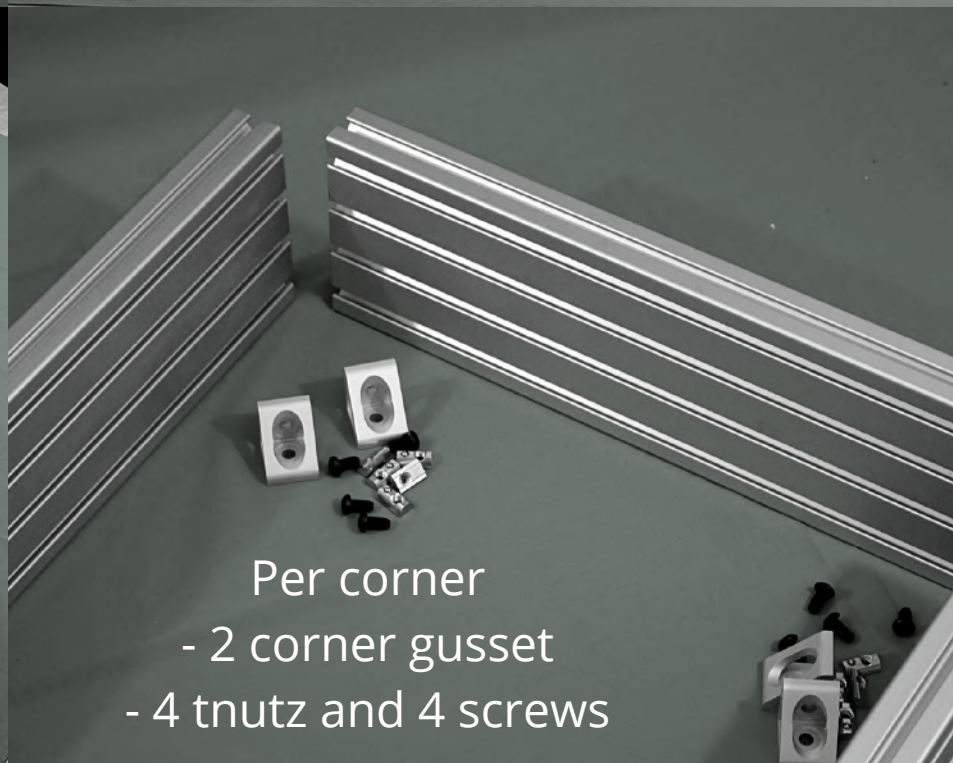

1x 19"

2x50"

Per corner
- 2 corner gusset
- 4 tnutz and 4 screws

Slide the "T" into the slot

Put screws and t-nutz in corner gusset.
leave enough space to slide in aluminum

Once everything is aligned , tighten all screws.

Do not tighten gusset.
slide the 19" bar

Prepare all 4 legs and plates.

Put the screws and t-nutz in the plates and slide them to the desired position.

Insert the rubber feet and put the nut to maintain the feet in position
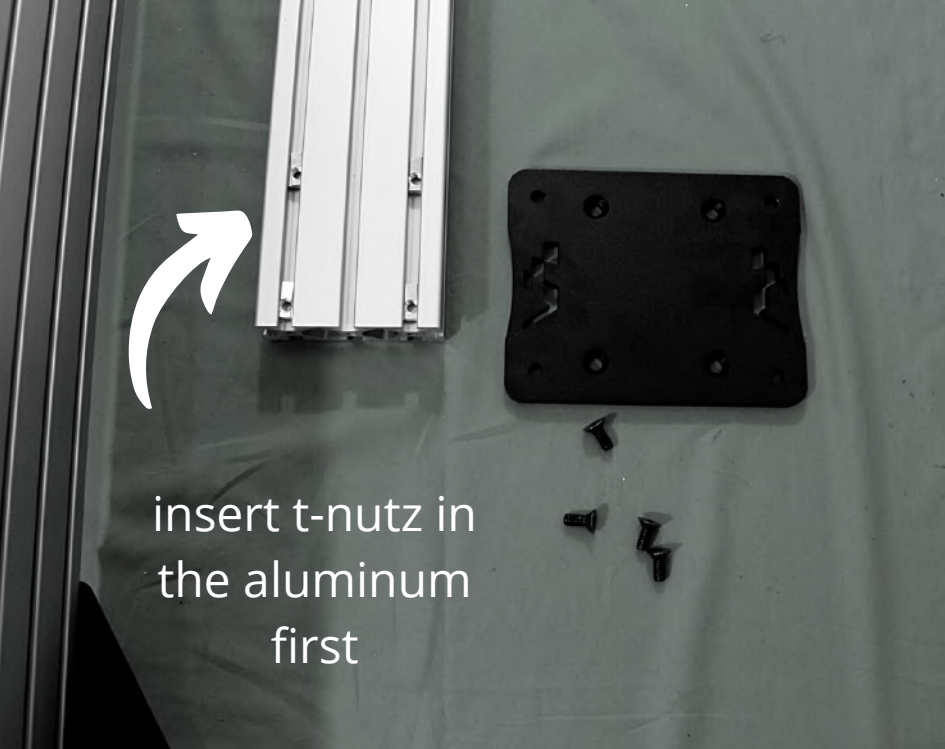

Once all for corners are done, flip it over.

Time for the side posts
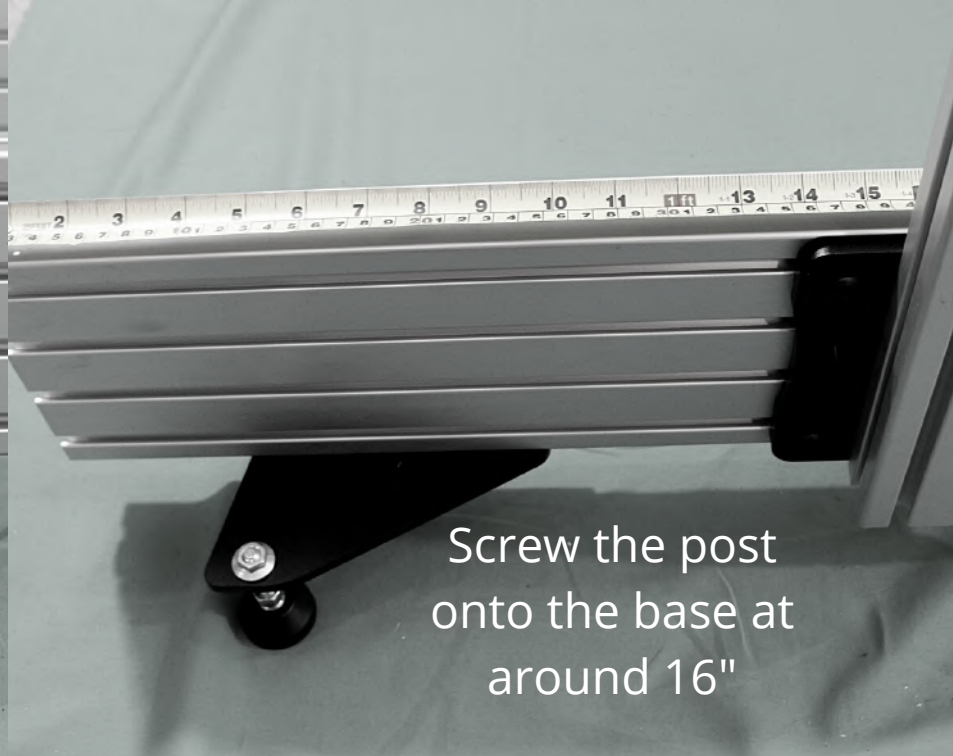

insert t-nutz in the aluminum first

Screw the thick plate onto the post
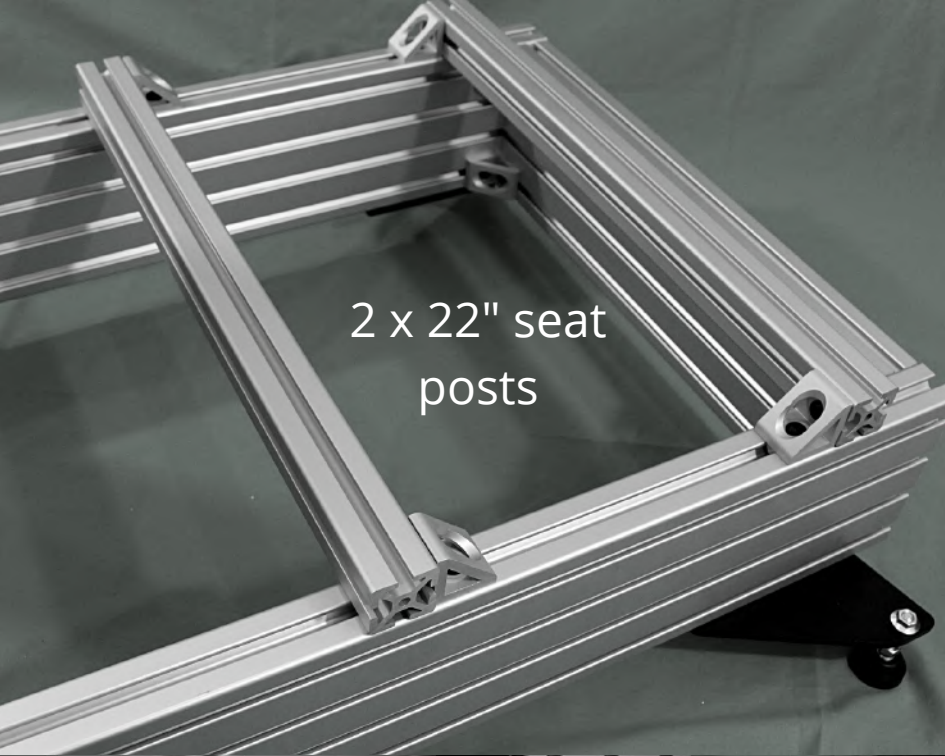

Insert the t-nutz in the first and last slot

Screw the post onto the base at around 16"
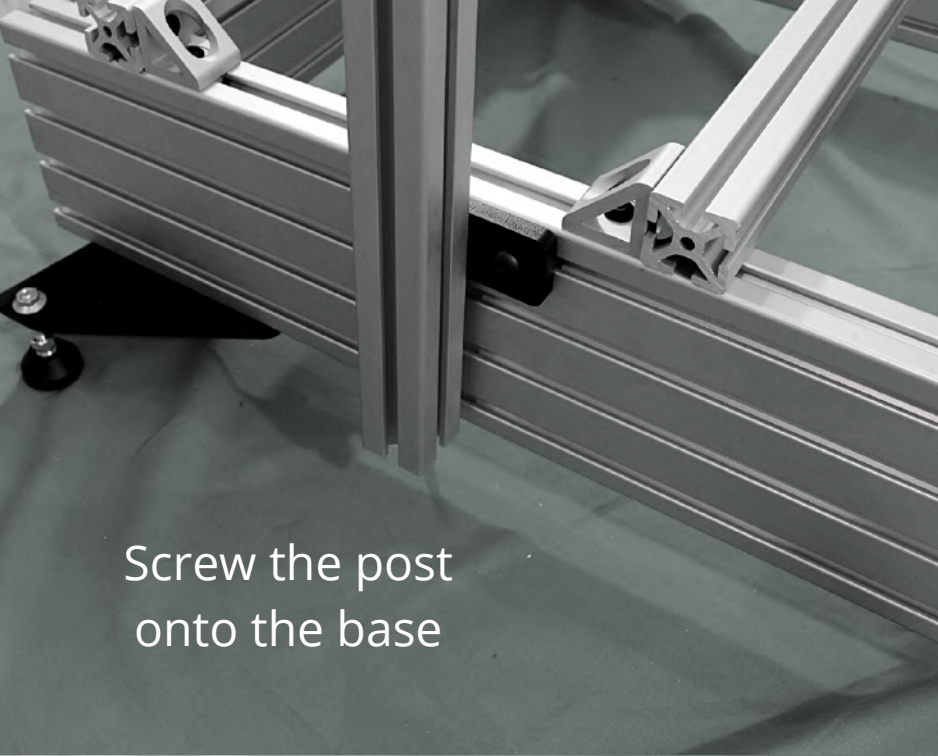

Here you go!

2 x 22" seat posts

Don't tighten these right away
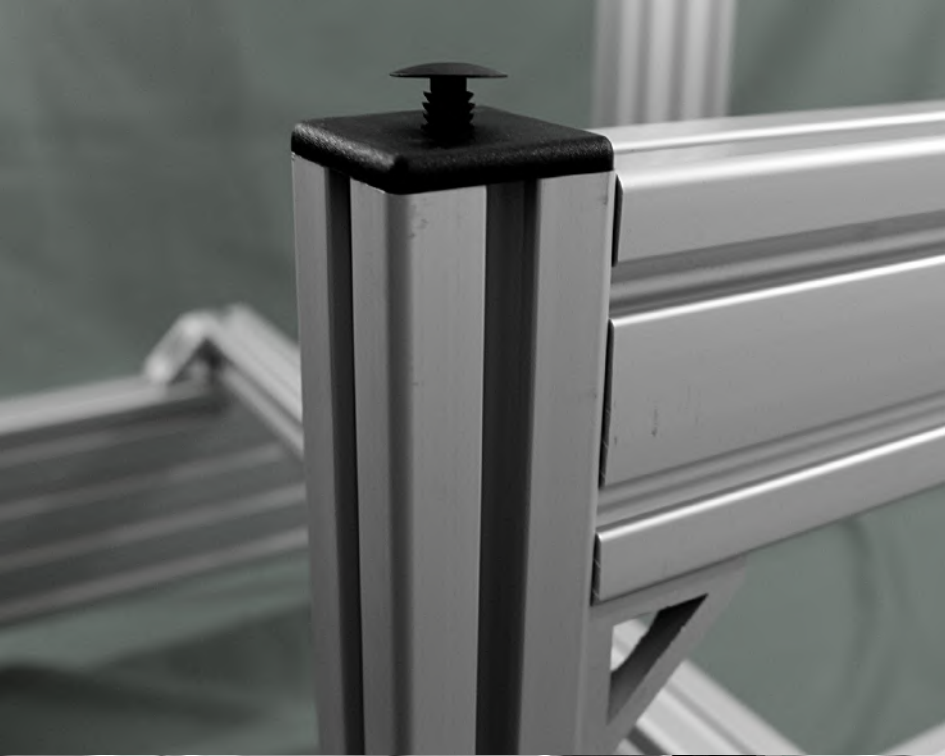

Time for the shifter arm

Screw the post onto the base

Screw the upper aluminum bar

Once to the desired position, tighen everything

Now you can put the plastic end caps...OR... wait till the end as it's a bit more satisfying
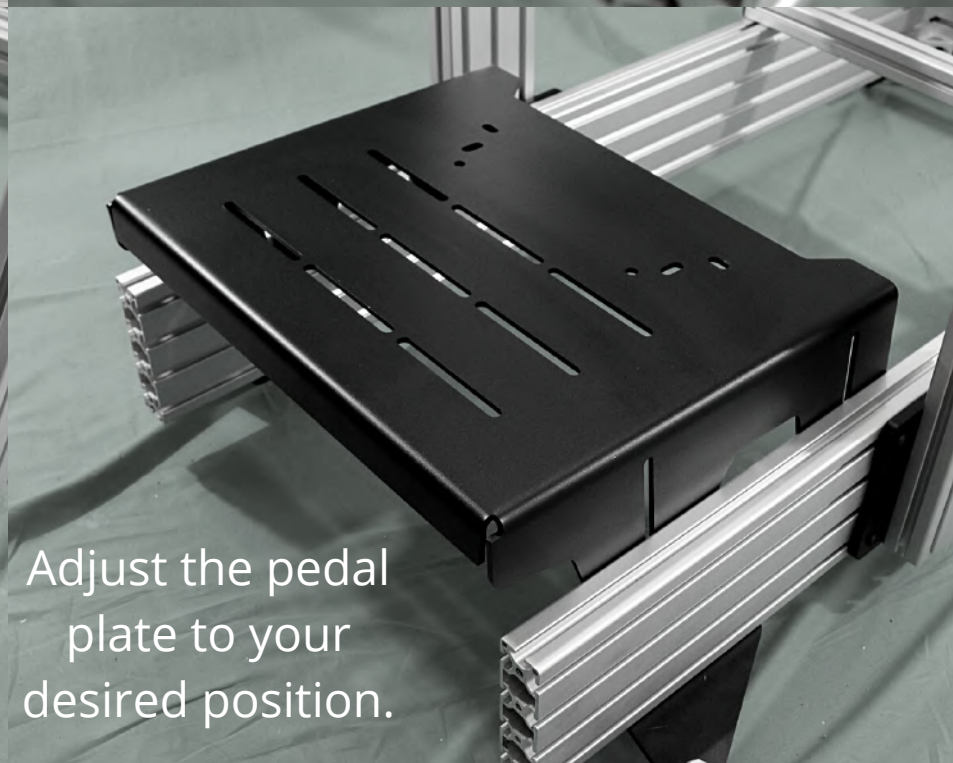

Time to install the wheel deck

Slide in the
wheel deck
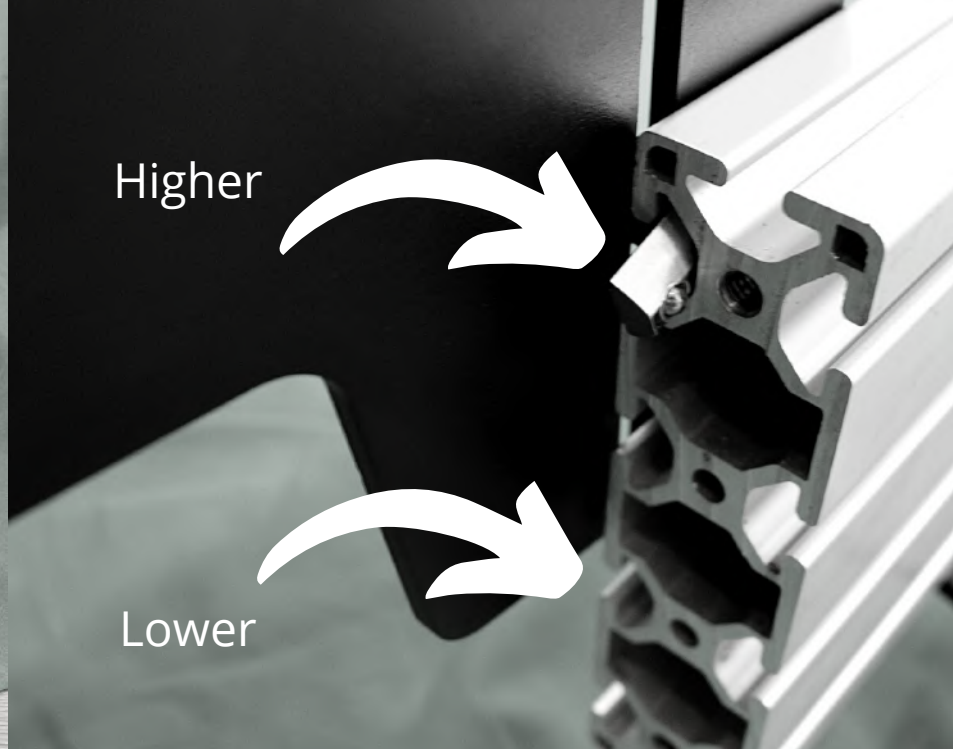

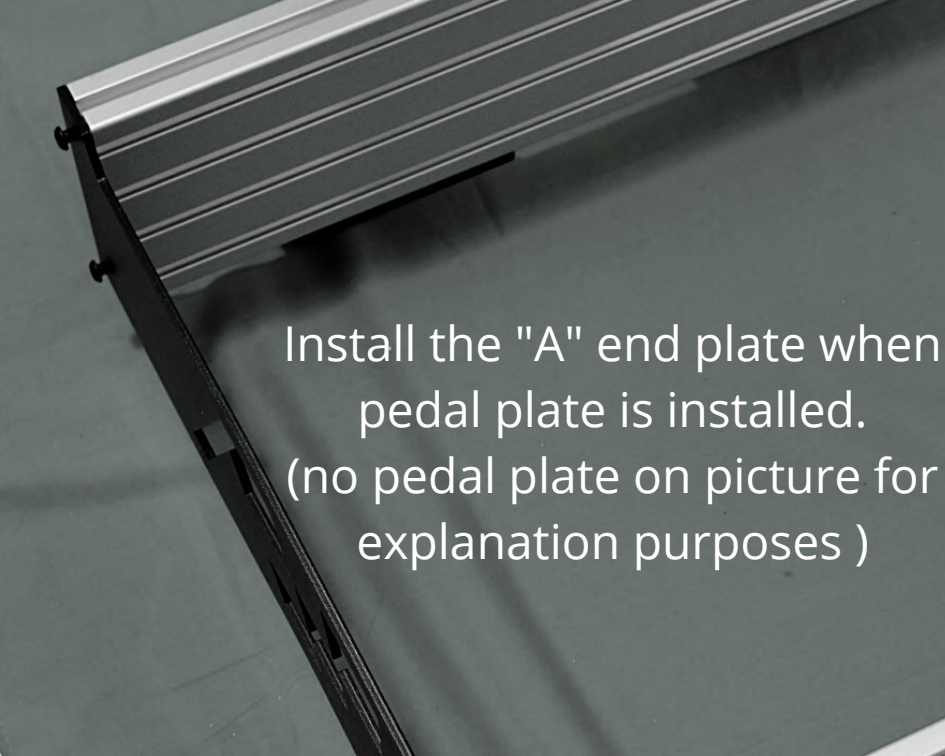

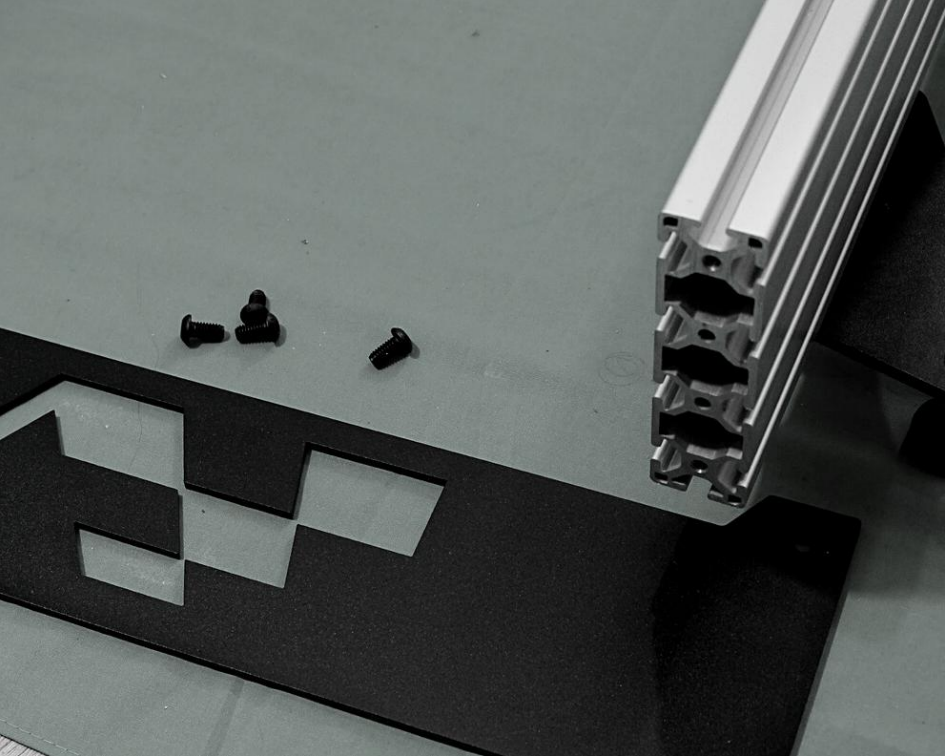

For the DD
base, install the
add-on to your
fanatec first
then slide in
the side posts.

For the pedal plate you can insert the screws in the slot that will fit your desired position.

Higher

Lower

Choose your angle

Adjust the pedal plate to your desired position.

Install the "A" end plate when pedal plate is installed.
(no pedal plate on picture for explanation purposes)
