

**DR. WACK**  
Premium Care

# Product Information

## The Problem:

Contamination / dirt on the paint can cause scratches during the shampoo wash (hand wash). We recommend using the A1 Power Foam Shampoo as a pre-cleaner with a foam sprayer or foam lance and for subsequent cleaning as a shampoo.

## The Solution:

# POWER FOAM Shampoo

**NEW!**

## Product Advantages:

## NEW FOAM TECHNOLOGY:

Dynamic changes to the foam bubbles ensure a micro-mechanical cleaning effect. This loosens the dirt from the surface actively, binds it to the foam and removes it from the surface.

- Very gentle on all surfaces
- Does not remove wax and sealing coats
- Suitable for all paint types (metallic, colour and matt paint), paint conditions (new to extremely weathered) and films (matt, glossy)
- Biodegradable

## Application Areas:

**For pre-treatment before polishing and waxing and for regular car washing applications. For all lacquer types and lacquer conditions**

## Application:

Rinse coarse dirt off with a large amount of water.

- **Using the foam hose (pressure washer):** Fill the product into the tank undiluted
- **Using the foam sprayer:** Add 1.5 to 2 caps (one cap = 30 ml) to 1 L water. Apply the foam to the vehicle and wait 2 to 3 minutes for it to take effect. Then rinse thoroughly with clean water
- **Using as a shampoo (hand wash):** Place 2 to 3 caps to a bucket and add 5 L water to foam it up. Wash the vehicle from top to bottom using a car wash mitt (we recommend A1 Wash Mitt - Premium Microfibre) or a cleaning sponge. Then rinse thoroughly with clean water and dry the vehicle.

### Recommendation:

The two-bucket method is ideal for gentle hand washing. One bucket with clean water and the second filled with water including a suitable cleaning agent.

### Note:

Do not use in direct sunlight or on hot paint. Do not allow the foam or washing fluid to dry on the vehicle. Store the bottle in a frost-protected place.

**RECOMMENDED ACCESSORY:**  
A1 Wash Mitt – Premium Microfiber

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
