Product-Information

The Problem:

Convertible soft tops are highly exposed to weather conditions, i.e. environmental impacts, like rain, wind and sun frequently afflict the soft top, compromising the water-repellent effect and causing the soft top to bleach. In addition, persistent dirt can stick to the so-called upper layers of the soft top, which is hard to remove because of the rough and soft surface. Each intensive mechanical cleaning can afflict the material.

The Solution:

Convertible Soft Top Proofer

Product Advantages:

Superior and stain-free water protection for all textile convertible soft tops

- Impregnates the textile soft top and thus protects the latter from moisture and material attacks e.g. through bird excrements
- Avoids a bleaching of the soft top fabric when applied regularly
- UV protection included
- Oil- and dirt-repellent
- Long-time effect
- Quick and easy application
- Also suited for clothing, canvas blinds and tents/camping

Applications:

Suitable for all textile convertible soft tops

How to apply:

Clean the soft top with A1 Convertible Soft Top Cleaner and let dry thoroughly. Shake can well before use. Spray-on the product evenly from a distance of around 20cm. Do not let the sprayed surface soak. Do not spray on glass and plastic screens or lacquer surfaces and protect the latter against spray. Let dry at a sun-protected place after treatment.

Note: Do not use in extreme direct sunlight or on heated surfaces.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
