

The Problem:

The chain and other moveable parts on mountain bikes, racing bikes etc. endure a great deal of stress. Then there are environmental factors, such as rain and dirt that reduce the mobility of moveable parts and accelerate wear and tear and corrosion.

The Solution:

Chain Oil

Product Advantages:

Long life for the chain set. Extra long lubrication

- Suitable for all parts requiring lubrication, such as chain, cartridge, suspension fork, damper, bowden cables etc
- Noticeably reduces friction (very smooth running of the chain and extends the life of the chain)
- Outstanding corrosion and wear and tear protection
- Excellent penetrating properties
- Long-lasting adhesiveness even when exposed to much stress

Application Areas:

For all bicycle parts that require lubrication

Application:

Use as Spray:

Shake can intensively before use. Apply a thin film of F100 Chain-Oil to the inside of the clean and dry chain and allow to air for approx. 5 minutes. Then wipe off excess oil using a dry cloth.

Use as Dropping Bottle:

Shake dropper bottle intensively before use. Apply F100 Chain-Oil to the inside of the clean and dry chain. Wipe off excess oil using a dry cloth.

Please note: Before use, clean chain with F100 Chain-Cleaner. Do not use on brake discs and brake pads, tyres or saddles.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
