

The Problem:

Most cyclists use water for bicycle cleaning often, however, a through water cleaning is too laborious for only mild or partial contamination. A wash station may not be nearby and following legal mandates regarding chain oil separation is complicated. Typically, for quick cleaning and maintenance (e.g. in a private garage or driveway), home products or personal remedies have been used. Such products are not specially formulated to treat bicycle dirt and grime, thus delivering poor cleaning results, and in worst cases, damage to the bicycle.

The Solution:

F100[®]

WATERLESS CLEANER

**THE NEW
EXPRESS-CARE**

Product Advantages:

Clean quickly and easily – without water! Perfect for cyclists without their own washing area or for those on the go!

- Waterless cleaning also ideal for e-bikes
- Gentle cleaning and care in one step
- Guaranteed material-compatibility on all surfaces
- Ideal for matt lacquer
- Preserves the varnish
- Protection against environmental influences
- Reduces dirt adhesion
- Gentle care
- Colour refreshing effect

Application Areas:

All bicycle surfaces, including matt varnishes and foils

Application:

Shake the bottle before use. Spray the „F100 Waterless Cleaner“ on the soiled surfaces and allow it to absorb for a few seconds (in case of heavier dirt 1 to 3 min). Then, wipe it down with a soft microfibre cloth. Remove any residues with a dry spot on the cloth. In case of stubborn soiling, please repeat the process.

Note: Do not let dry. Don't apply in direct, hot sun or on heated surfaces. This product is not to be used on break discs!

Tip: We guarantee a perfect application with F100 THE CLOTH.

Ideal addition:
F100 THE CLOTH
Premium Microfibre

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
