

The Problem:

The gentle and thorough removal of stubborn dirt such as burnt-in insects, tar and resin stains, bird droppings, etc. could previously only be achieved with several, sometimes aggressive, special products. With the A1 ALL in ONE Intensive exterior cleaner, it is now possible for the first time to remove all layers of dirt and sealants thoroughly, scratch-free and very gently.

The Solution:

ALL in ONE Intensive exterior cleaner

NEW!

Product Advantages:

- Our new product can remove all dirt from the surface gently and without causing scratches
- Prepares the paint perfectly for subsequent treatment (e.g. polishing and/or waxing and sealing)
- It removes insects, bird droppings, tar spots and wax or sealing coats
- Does not cause any scratches
- Solvent-free
- Biodegradable

Application Areas:

Suitable for all surfaces such as paint, plastic, metal, glass, headlights and all types of tyres

Application:

Rinse away coarse dirt thoroughly with sufficient water. Shake bottle well before use. Apply the product sparingly to a wet sponge or car wash mitt (we recommend A1 Wash Mitt) and rub with slight pressure. Add more if necessary. Finally, rinse with plenty of water until no product residues remain. For stubborn dirt (small surfaces), allow the product to work for no more than 3 minutes in a second pass, clean with slight pressure again and then rinse.

Note:

Do not use in direct sunlight or on hot paint. Do not allow the product to dry on the vehicle. If the product dries on, use clean water and a car wash mitt or a washing sponge to remove product residues. Store the bottle in a frost-protected place. Do not expose to temperatures above 50°C /122°F. Do not use on matt paint or matt foils.

RECOMMENDED ACCESSORY: A1 Wash Mitt – Premium Microfiber

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
