

DR. WACK
Premium Care

Product Information

The Problem:

Car lacquers are highly stressed by environmental impacts, like UV radiation, rain, insects, bird excrements, etc. and must therefore be protected from these impacts. In addition, conventional waxes are very complex to process and take a lot of time.

The Solution:

HIGH END Speed Detailer

NEW!

Product Advantages:

Shiny finish with beading booster

- The innovative formula effortlessly provides a special kind of gloss finish and an impressive water-beading effect
- Really quick and easy to apply without clouds or streaks
- The integrated beading booster enhances existing sealants (including ceramic sealants)
- Cleans light dirt such as dust, fingerprints without scratching
- Leaves a smooth finish
- Can also be used as a drying aid on wet paintwork
- Does not leave white streaks on plastic parts
- Ideal for all types of paint (metallic, multi-colour, nano and more scratch-proof paints) and glossy foils

Application Areas:

For all types of paint (metallic, multi-colour, nano and more scratch-proof paints) and glossy foils

Application:

Shake bottle well before use. Turn spray nozzle to spray position. Spray a thin layer of A1 HIGH END Detailer onto adjacent clean areas of the paintwork and spread evenly with A1 THE CLOTH – Premium microfiber. There's no need to wait before wiping off any residues using the unused side of the cloth. Turn spray nozzle back to stop position (leakage protection).

Note: Do not use in direct sunlight or on hot paint. Store the bottle in a frost-protected place. Proceed in stages and avoid letting the product dry out during application. For dried on product, simply re-spray the area, use the cloth to spread it and wipe it off.

Recommendation:

- Ideally use two cloths for the application
- One A1 THE CLOTH – Premium microfiber only for spreading and the second only for wiping
- To enhance the long-term effect, protect the paint from moisture for at least 2 hour after application

RECOMMENDED ACCESSORIES:

For perfect application:

2x A1 THE CLOTH – Premium microfiber

To spread

To wipe off

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
