

The Problem:

Heat, moisture, UV radiation and dirt, etc. heavily afflict the leather and accelerate the aging process. This means the leather becomes brittle and cracky.

The Solution:

Product Advantages:

Contains jojoba oil - Keeps leather smooth and protects against the ageing process

- High-quality jojoba oil provides long-lasting protection (temperature and age-resistant). Preserves suppleness of leather
- Prevents the formation of new cracks and the deterioration of existing cracks
- Protects leather from bleaching due to UV radiation
- Restores the original surface finish and color depth
- Protects against soiling, causes water beading
- Does not contain aggressive substances – completely solvent-free
- Does not leave a greasy finish

Heft 12/2013

Application Areas:

All smooth leather grades as well as adequate for artificial leather. Not suitable for suede.

Application:

Shake well before use. Apply evenly and sparingly on a clean, dry surface, using a finepored sponge. In case of perforated leather, apply carefully with a soft and absorbent cloth. Allow time for the product to react, depending on the leather's absorptivity. Polish with a cloth or soft brush.

Recommendation: Depending on the condition of the leather, we recommend using A1 Leather Cleaner beforehand.

Note: Do not use in direct sunlight or on heated surfaces. Store properly closed in a frost-protected place.

The product's liquid content must be two thirds full. Returned consignments must be correctly stamped and proof of purchase (invoice) included.
